

BANKING + INFRASTRUCTURE

SPOTLIGHT

“I REGARD THEM VERY HIGHLY: THEY’RE COMMERCIAL, THEY PROVIDE GOOD ADVICE...AND THEY’RE ALSO REALLY PLEASANT TO WORK WITH.”

CLIENT FEEDBACK

LINDSAY CRAWFORD,
Lawyer

My practice tends to centre around energy (including renewables) and resources projects, with the odd PPP every now and again. I find this work in these sectors interesting because it’s technical and the sectors are integral to our economy, so you always feel like you’re working on matters that are important. The deals we work on are often in the news, which adds to the feeling that you’re working for a firm at the forefront of the market.

Although I’m based in Melbourne, my work has taken me to all sorts of places, including the Blue Mountains and Perth. I was even lucky enough to attend Australia’s 47-26 thumping of New Zealand in the Bledisloe with the firm and some of its key WA clients (let’s not discuss the following week’s result). We regularly work with clients and colleagues in Sydney, and trips to the Harbour City are frequent.

Some other great things about my job are that the people I work with a very sociable, in addition to being at the top of their game (the two are often considered mutually exclusive!) – our team is known for its lunches and Friday beverages. I’m also involved in G+T<i>, which allows me to have input on the direction G+T is taking with legal technology.
