

BARA-KADE® GRANULAR

Construction
Bentonite

BARA-KADE GRANULAR is a granular high-quality Wyoming sodium bentonite and is used as a sealant for ponds, lakes, reservoirs, and other stationary waters. BARA-KADE GRANULAR is screened to create an easy to pour, low dust product. It exhibits extremely low permeability and has a high swelling capacity.

	Specifications
Moisture, %	12.0 Max
Bulk Density (compacted), lbs/ft ³	72
Specific Gravity	2.7
Dry screen, % minus 200 mesh	5.0 max

Directions for Use

Depending on the soil type, typical usage rates for BARA-KADE GRANULAR can be between 2 and 5 lbs/ft².

Packaging

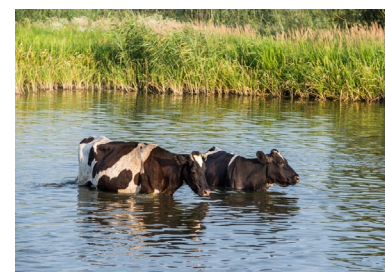

BARA-KADE GRANULAR is sold in 50 lbs. and bulk bags and can ship from our Lovell and Colony, WY plants.
