

AGRI-FLOW™ is a natural, high-purity Wyoming sodium bentonite ground to 200 mesh. AGRI-FLOW finds a home in a vast array of agricultural uses as it is inert and Generally Recognized As Safe (GRAS) by the US FDA.

AGRI-FLOW has a high cation exchange capacity, high moisture affinity, and good dispersibility. AGRI-FLOW can be used as an excellent carrier for fertilizers and as a soil amendment in sandy soils to create a healthy loam and develop a growing medium. AGRI-FLOW increases the Liquid Limit and Plastic Limit of sandy type soils. It has a high Plasticity Index which improves soil structure, and aids in retention of water and essential nutrients. It also can reduce erosion.

Applications/Functions

- Soil amendment
- Fertilizer carrier
- Absorbent

Advantages

- High cation exchange capacity
- High Swell Index
- Dispersible powder
- High montmorillonite composition

	Specification
Appearance	Blue, gray
Moisture, %	12.0 Max
Swell Index, ml	25 Min
Specific Gravity	2.7
Screen Analysis, Dry (-200 mesh), %	67.5%
Bulk Density (uncompacted), lbs/ft ³	53

Packaging

AGRI-FLOW is available in 50 lb. and bulk bags and ships from our Colony and Lovell, WY plants.
