

SELECTCHEM® 325

SPECIALTY AGRICULTURAL BENTONITE

SELECTCHEM® 325 is a high-purity, natural Wyoming sodium bentonite milled into a 325 mesh powder. SELECTCHEM 325 is inert and Generally Recognized As Safe (GRAS) by the US FDA.

SELECTCHEM 325 powder is used in seed coating to increase the size and shape of the seed allowing for easier handling and dispersion during planting. SELECTCHEM 325 increases moisture absorption allowing better germination. SELECTCHEM 325 also serves as an excellent carrier and binder of both liquid and dry nutrients, pesticides or fungicides, and colorants. SELECTCHEM 325's finer grind means customers get better dispersion and full yield from the product.

SELECTCHEM is just one product in a suite of specialty bentonite offerings from BPM under the SELECT CHEM, EXPANDA®, and VITIBEN® brands.

	Specification
Appearance	Blue, gray
Bulk Density, lbs./ft ³	65
pH	9.5
Moisture, %	12.0 Max
Screen Analysis, Dry (-325 mesh), %	95.0 Max

Packaging

SELECTCHEM 325 is available in 50 lb. bags and bulk bags and ships from our Colony, WY plant.

Applications/Functions

- Feed additive
- Increases size and shape of seeds
- Increases moisture absorption
- Binder for nutrient additives
- Flow modifier

Advantages

- Better dispersion, efficient usage
- Stable over a range of pH and temperatures
- Micronized powder
- GRAS
