

NATIONAL[®] CAT 10

GRANULAR BENTONITE for PETS

NATIONAL[®] CAT 10 is a natural sodium bentonite (clay) used in premium cat litters and other pet absorbent products. Sodium bentonite provides a clean and hygienic option for indoor pets. NATIONAL CAT 10 has been sized with larger particles to lower the dust profile. This larger sizing also produces a much cleaner looking litter while still offering excellent clumping. The inorganic nature of NATIONAL CAT 10 limits bacterial growth thus reducing waste odors. Like all BPM clays, NATIONAL CAT 10 is an excellent carrier for odor control additives including probiotics, fragrance, and even other minerals. This product is known internationally as having consistent properties and a homogenous, light gray color.

	Specification
Moisture, %	12.0 Max
Specific Gravity	2.7
Bulk Density (uncompacted), lbs/ft ³	65
Bulk Density (compacted), lbs/ft ³	73
Dry Screen (plus 10 mesh), %	45 Max
Dry Screen (minus 70 mesh), %	1 Max
Dry Screen (minus 200 mesh), %	.5 Max

Packaging

NATIONAL CAT 10 is available in bulk bags and bulk rail and ships from our Lovell, WY plant.

Applications/Functions

- Cat Litter
- Pet Absorbents
- Desiccation
- Odor Control

Advantages

- Controlled particle size
- Cleaner look
- Firm clump
- Low dust
- Inorganic nature limits bacteria growth
- Consistent gray color
