

# NATIONAL<sup>®</sup> GRANULAR

BENTONITE  
for PETS

**NATIONAL<sup>®</sup>** is offered in a range of sizing including **8, 10, 12, 16, and 30**. Each granular size offers a unique range of attributes. NATIONAL is a natural sodium bentonite (clay) used in premium cat litters and other pet absorbent products. Sodium bentonite provides a clean and hygienic option for indoor pets. All NATIONAL products have been engineered and processed to lower the dust profile. Because NATIONAL is offered in a range of sizing, customers can focus on using the larger sizing to create cleaner looking litters with deeper clumps or using the finer sizes to create longer lasting litters with flatter clumps. The inorganic nature of NATIONAL limits bacterial growth thus reducing waste odors. NATIONAL's wide sizing range allows customers to determine the optimum product size to maximize ingredient packages including probiotics, fragrance, odor controllers, and even other minerals. This product is known internationally as having consistent properties and a homogenous, light gray color.

	Specification
Moisture, %	12.0 Max
Specific Gravity	2.7
Bulk Density (uncompacted), lbs/ft <sup>3</sup>	65
Bulk Density, (compacted), lbs/ft <sup>3</sup>	73
Screen sizing, US Mesh	Available upon request

## Packaging

NATIONAL GRANULAR is available in bulk bags and bulk rail and can ship from our Colony or Lovell, WY plants.

## Applications/Functions

- Cat Litter
- Pet Absorbents
- Desiccation
- Odor Control

## Advantages

- Range of particles sizes offered
- Maximizes efficacy of ingredients
- Firm clump
- Low dust
- Inorganic nature limits bacteria growth
- Consistent gray color
