

NATIONAL[®] PET is a natural sodium bentonite (clay) used in premium cat litters and other pet absorbent products. Sodium bentonite provides a clean and hygienic option for indoor pets. NATIONAL PET has been engineered to optimize clumping while significantly reducing airborne dust. The inorganic nature of NATIONAL PET limits bacterial growth thus reducing waste odors. NATIONAL PET is an excellent carrier and medium for odor control additives including probiotics, fragrance, and even other minerals. This product is known internationally as having consistent properties and a homogenous, light gray color.

	Specification
Moisture, %	12.0 Max
Specific Gravity	2.7
Bulk Density (uncompacted), lbs/ft ³	65
Bulk Density (compacted), lbs/ft ³	73
Dry Screen (plus 10 mesh), %	7 Max
Dry Screen (minus 70 mesh), %	1 Max
Dry Screen (minus 200 mesh), %	.5 Max

Packaging

NATIONAL PET is available in bulk bags and bulk rail and can ship from our Lovell, WY plant.

Applications/Functions

- Cat Litter
- Pet Absorbents
- Desiccation

Advantages

- Firm clump
- Low dust
- Inorganic nature limits bacteria growth
- Engineered for optimal particle size distribution
- Consistent gray color
