

VITIBEN® is BPM's wine, juice and beverage clarifying agent that produces superior clarity and heat stability. VITIBEN is designed to "fine" or remove undesirable compounds from wine and juice including phenolics, proteins, and tannins. If not removed, these natural compounds can cause haze, browning, off-flavors, post bottling settling, and poor shelf life. VITIBEN absorbs and coagulates these undesirable substances so they can be easily filtered out during fining and clarifying. VITIBEN is produced as a quick dispersing, low dust granule.

VITIBEN is just one product in a suite of specialty bentonite offerings from BPM under the SELECTCHEM®, EXPANDA®, and VITIBEN brands.

	Specification
Moisture, %	12 Max
pH	9.5
Bulk density (compacted), lbs/ft ³	73
Specific gravity	2.7
Dry screen, % plus 10 mesh	1.0 Max
Dry screen, % plus 12 mesh	10.0 Max
Dry screen, % minus 70 mesh	1.0 Max

Packaging

VITIBEN is available in 50 lbs. bags and bulk bags and ships from our Colony and Lovell, WY plants.

Applications/Functions

- Wine and juice clarifying
- Fining
- Lees compaction
- Hazing reduction
- Imparts greater heat stability

Advantages

- Superior dispersibility
- Easy handling
- Higher yields
- Higher activity
- Low dust granular
- Kosher certified
