

# CUSTOM SERVICES

## Bulk Processing & Bagging

**CUSTOM SERVICES** is a suite of offerings by BPM that focuses directly on the needs of our broad customer base. BPM is a fully integrated sodium bentonite mining and processing company that offers services from selective mining to logistics.

**MINING** services can be tailored to specific customer needs. Each industry requires unique clay specifications, and each clay bed is often suited to a specific industry or application. These clays are commonly provided as Crushed and Dried (C&D), but they also can be milled for further customization.

**MILLING and BAGGING** services allow customers to optimize their products and minimize waste during handling. Milling options allow product sizing from ¾ chips to 325 mesh. BPM can bag most powders, granules, and chips from 50 lbs. up to 3000 lbs. bulk bags.

**LOGISTICS and TRANSPORTATION** services are offered by BPM's Logistics Group. BPM works with a range of logistics carriers to ensure we can ship orders from one pallet to an entire vessel of clay. BPM has built a network of trans-loaders to provide the lowest total cost of ownership when shipping domestically or across the globe.

### Services

- Mining & blending ore
- Milling & bagging
- Private labels
- Logistics, transportation, and export services

	Specification
Mining	Sodium bentonite, multiple beds
Milling, US mesh	200 - 325
