

Hydrometer Kit

The Fann Hydrometer Kit includes eight (8) hydrometers to measure specific gravity in the range from 0.8 to 2.4 specific gravity (SG) at 60°F.

A thermometer with a scale of -30°F to 120°F is a standard accessory to the kit. All the instruments are protected in a non-corrosive, padded, easy to carry case. Individual pieces of the kit are available upon request. A 250ml cylinder (made of heavy glass) is offered as a convenient addition to the kit.

All hydrometers measure to the nearest 0.002 specific gravity. These hydrometers are recommended for use in brine analysis and are designed to work in conjunction with Fann's Brine Test Kit.

Order Part No. 206545 Hydrometer Kit

Included Parts

Part No.	Description	Specific Gravity Range
206546	Hydrometer	.800 to .910
206547	Hydrometer	1.000 to 1.220
206548	Hydrometer	1.200 to 1.420
206549	Hydrometer	1.400 to 1.620
206550	Hydrometer	1.620 to 1.820
206551	Hydrometer	1.800 to 2.020
206552	Hydrometer	2.000 to 2.200
206553	Hydrometer	2.200 to 2.400
206040	Thermometer -30°F to 120°F	

Hydrometer Cylinder
Part No. 206558
Sold Separately

Fann also supplies Brine Test Kits and Brine Crystallization Kits
