

AGRI-TROL is a specialized Hydrated Sodium Calcium Aluminosilicate (HSCAS) 200 mesh powder produced from bentonite reserves in Wyoming. AGRI-TROL is engineered by extruding the bentonite with a quaternary amine resulting in a hydrophobic material.

AGRI-TROL provides adsorption of a wide array of organic contaminants and has excellent binding and filtration properties.

	Specification
Appearance	Gray to tan powder
Bulk Density (compacted), lbs./ft ³	57
Bulk Density (uncompacted), lbs./ft ³	35
LOI, %	34 - 40
Solubility in water	Insoluble
Specific Gravity	1.7
Screen Analysis, % passing 200 mesh	84% Min

Directions for Use as a Feed Additive

AGRI-TROL can be added either to a mineral premix or directly into the feed ration. Addition range is 1 to 2 kg/ton (0.1% to 0.2%).

Packaging

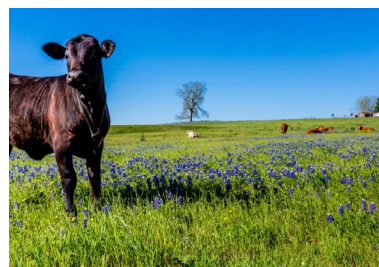

AGRI-TROL is available in 50 lb. bags. Made in the USA.

Applications/Functions

- Feed additive
- Contaminant adsorption
- Organically modified
- Protects animal health

Advantages

- Stable over a range of pH and temperatures
- Broad spectrum efficacy
- Made in the USA
