MIRKA® PLASTIC REPAIR SOLUTION

Powered by 4PLASTIC™

Repair More, Replace Less

Reduce claim costs, improve profitability

Faster, Filler-Free Repairs

Reduce repair time with a standardised, filler-free repair process.

Complete Plastic Repair Solution

Repair bumpers, grilles, mirror housings and more with one solution.

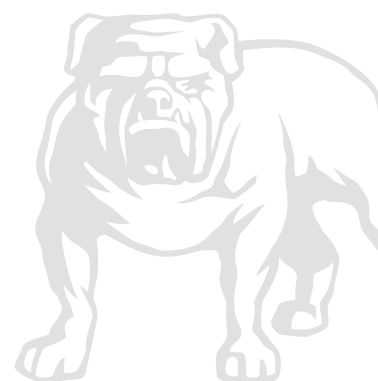

Enable Filler-Free OEM-Compatible Plastic Repairs

It's time to make plastic repairs a viable option for body shops, car owners and insurance companies alike. Together with 4Plastic, Mirka is introducing a plastic repair process that represents the best practices and features easy-to-use tools and accessories for OEM-compatible repairs.

The primary reason for the industry's lingering preference for replacements over repairs in plastic is not economic; rather, it stems from a widespread lack of know-how and standardised repair methods.

That's why the **Mirka Plastic Repair Solution** is such an important contribution to the collision repair industry. The idea behind the kit is not only to offer new products, but to make plastic repairs standardised, accessible, OEM-compatible and worthwhile.

Made for Validated Repair Processes

The Mirka® Plastic Repair Solution Powered by 4Plastic, offers OEM-compatible repairs for various automotive plastic components, such as bumpers, grilles, mirror housings and trims.

The kit includes plastic welding rods made from a patented polypropylene formula for reliable thermal integration and specialised tools like a bumper push hand tool and tab repair jig for secure repairs.

This integrated workflow simplifies complex repair operations, reduces variability, and boosts technician productivity, all while ensuring high-quality results.
