

MIRKA

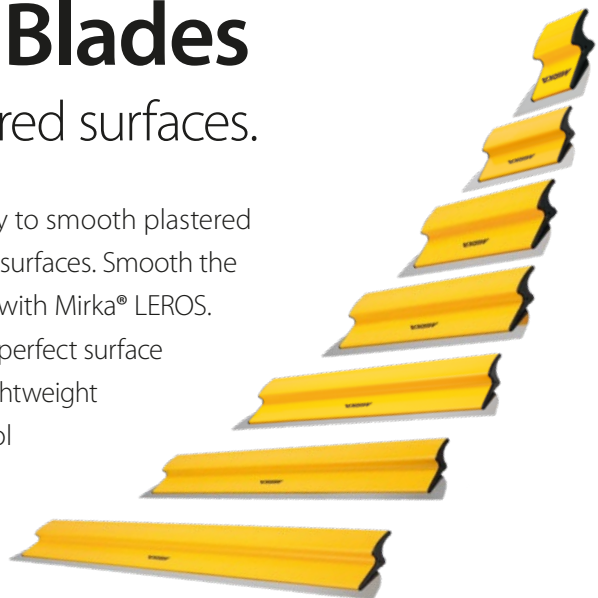

Mirka® Skimming Blades

Best tool for smoothing plastered surfaces.

Mirka Skimming Blades is an ergonomical and easy way to smooth plastered surfaces, especially on spray plastered or rolled plastered surfaces. Smooth the surface with the blades before doing the finishing work with Mirka® LEROS. Featuring high-quality stainless-steel blades, this provides perfect surface preparation. The ergonomic design reduces wrist strain. Lightweight construction for comfortable all-day usage, and the tool is shaped to deliver excellent control of the tool.

The wide range of sizes plus extension pole will suit any application.
