

The ideal solution for sanding door and window mouldings

Sanding the mouldings of doors and windows by hand is a lengthy, tiring, dusty job. With the new Mirka Groove interfaces, mouldings can be sanded using a machine, making the process much quicker and obtaining a constantly uniform finish without dispersing dust into the environment.

Technical specifications	Groove Medium interface	Groove Soft interface
Thickness	10 mm	6 mm
Dimensions	100 x 150 mm	100 x 150 mm
Holes	84	84
Density	Medium	Soft

Groove Medium and **Soft interfaces** have 12 pre-cut segments of 12.5 mm. Depending on the width of the mouldings for sanding, users can simply detach the segments required from the interface, apply them to the plate of the Mirka® DEOS 343 CV 75x100 mm electric sander and add Abranet® or Abranet® Ace net abrasive strips.
