Mirka[®] PRO Finishing Solution

An easy & fast solution for spot repair

Dust particles and other defects can be a challenge when striving to manufacture products with a perfect glossy surface. Removing these defects is crucial to achieving a consistent finish. Now Mirka offers a simple, fast and reliable system for a high-quality surface finish, **The Mirka PRO Finishing Solution.**

The Mirka PRO Finishing Solution combines spot sanding & polishing to give you that pro-level result.

MIRKA

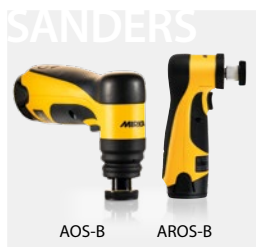

THE PRO FINISHING SOLUTION

is a system that is aimed towards
OEM & Automotive manufacturers.

THE PRO FINISHING SOLUTION

THE PRO FINISHING SOLUTION is designed for easy and fast removal of defects and imperfections from the final surface. This post-paint process combines Mirka's surface finishing experience with innovative abrasives and cordless tools. It is easy and fast and produces a high-quality result.

FEATURING THESE MIRKA PRODUCTS

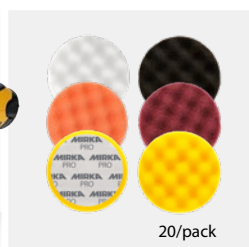

Mirka® AOS-B 130NV and
Mirka® AROS-B 150NV

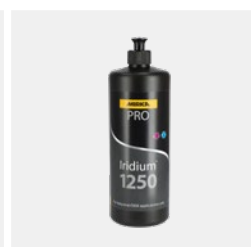

Mirka Iridium™ SR 3, SR 5, SR 7
and Iridium SR 9 abrasives

Mirka® ARP-B 300NV and
Mirka® AROP-B 312NV

Polishing Foam Pad: Yellow,
White, Burgundy or Orange Waffle.

PRO Iridium 1250
polishing compound

THE PRO FINISHING SOLUTION PROCESS

Sanding the imperfections is done
with our cordless spot repair sanders
and Iridium SR spot repair discs.

Especially
developed for
the PRO Finishing
Solution.

Apply Mirka's newest addition to the
range of polishing products: PRO
Iridium 1250 Polishing Compound.

The sanded area is then polished using
Mirka cordless polishing machines
and PRO polishing pads.

Normally polishing when removing surface defects is a two-step process, where you use one compound to remove the scratch marks from the sanding. PRO Iridium 1250 is developed to give you the best of both worlds, meaning you only need to polish once, while still getting a perfect result.
