

MIRKA

Polarshine[®] MARINE

Permanent removal of scratches.
High gloss finish.

Give your boat a lasting shine from season to season with Mirka's new line of marine polishing compounds, designed to save you time and money in boat maintenance with an effective and permanent removal of scratches.

The water borne, silicone free and sustainable Mirka Polarshine Marine polishing compounds range from Heavy Cut and Medium Cut to Fine Compound, Antihologram polishing. As well as renewing the damaged and oxidized surface and removing sanding scratches and impurities, they cut the time required from start to finish.

Polarshine. Inspired by nature, respectful of the environment.

NEW!

Polarshine® MARINE

- **HEAVY CUT COMPOUND**
 Heavy cut polishing compound for permanent removal of severe oxidation, deep scratches and sanding scratches from grit 800 and finer.
- **MEDIUM CUT COMPOUND**
 Medium cut polishing compound for quick removal of oxidation and sanding scratches from grit 1000 and finer.
- **FINE COMPOUND Antihologram**
 Polishing compound for quick removal of holograms and swirl marks from marine gelcoat, topcoat and clear coat surfaces.

Polarshine MARINE Polishing Compound bottle sizes: 1 L.

Polarshine® MARINE

Restoring a surface with Mirka's Polarshine Marine could not be easier: it is all about speed and gloss. Simply apply the correct compound on a twisted wool, lambswool or waffle polishing pad and buff the surface with a rotary polisher for effective and efficient result.

Depending on the severity of oxidation and scratches on gel coat, topcoat or clearcoat, Polarshine Marine Heavy Cut and Medium Cut save you precious time as they produce a deep gloss even as a one-step solution. For restoring hard surfaces and coatings such as gel coat, choose **Heavy Cut**, for topcoat and clearcoat, choose **Medium Cut**.

For an additional finishing step on these surfaces, **Fine Compound, Antihologram** polishing gives you an even longer lasting gloss while removing holograms and swirl marks on gel coat, topcoat and clearcoat.

Use with:

Mirka® PS1437 Polisher

Mirka Microfiber cleaning cloth

Twisted lambswool pad

A pure wool pad for coarser polishing in marine, wood and ART applications.

Lambswool pad PRO

Made of premium wool fibers optimized to keep performance on high level for demanding use.

Yellow waffle foam

Medium density hardness and waffle shape with excellent elasticity. Optimized pattern improves cutting performance.

Black waffle foam M

Optimized pattern for long-lasting and improved cutting performance. Excellent balance in elasticity and softness. Reduces surface temperature during polishing.
