# Execute your global vision using Marqeta's single, trusted, and global platform

Marqeta offers a build once, deploy anywhere model to help you avoid reimplementation of your payment processing within each region as you expand your card program. Unlike other processors that are built through acquisitions, Marqeta's single, global platform has grown organically and does not require client integration or reimplementation.

Marqeta's global operations include 24/7 program support and a modern cloud infrastructure with 99.99% uptime that automatically scales as your transaction volume grows. It also comes equipped with built-in redundancy, disaster recovery, and failover.
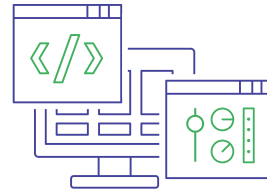

Marqeta offers both a card processing platform (Marqeta Powered) as well as a combination of a processing platform and program management services (Marqeta Managed).

Marqeta Powered

Marqeta Powered offers an open API platform and modern infrastructure for processing card payments at scale. This package provides standard services including operational and technical onboarding, advice on banking identification number (BIN) types, BIN installation with various card networks, and a custom environment with basic configurations for your API development. In this model, regulatory and compliance responsibilities reside solely with you.
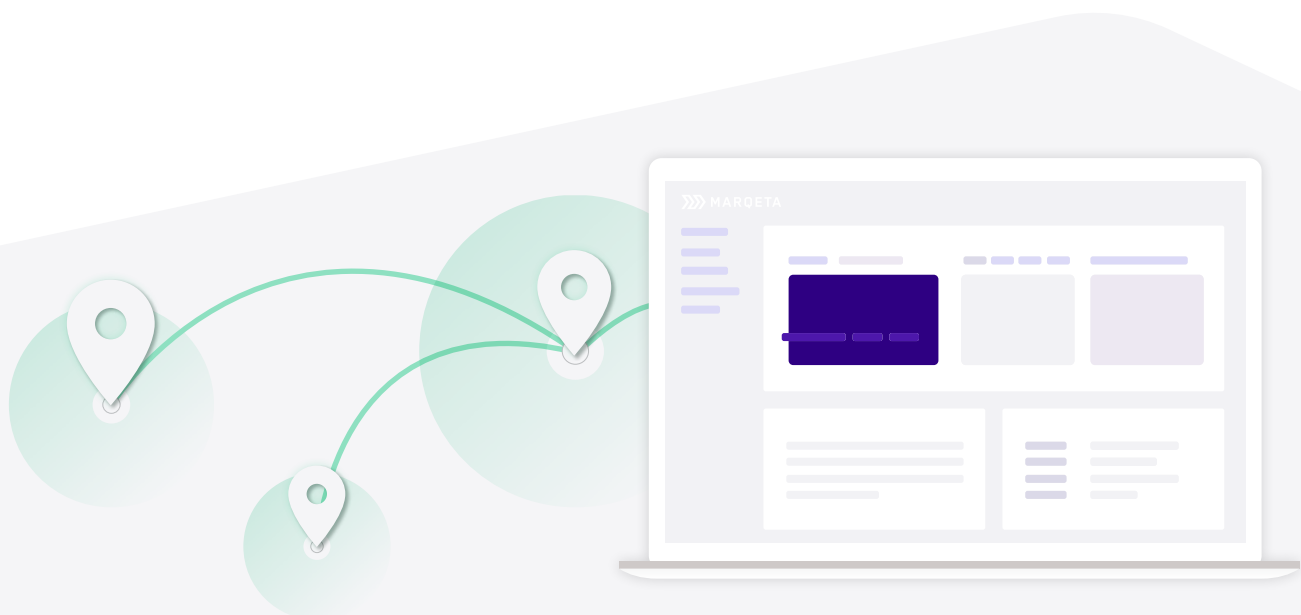

With this option you have the opportunity to obtain any required licenses on your own, or work directly with an issuing bank for BIN sponsorship. You also get to establish direct partnerships with the card network schemes to create your own program terms and build the right business model for your strategy.
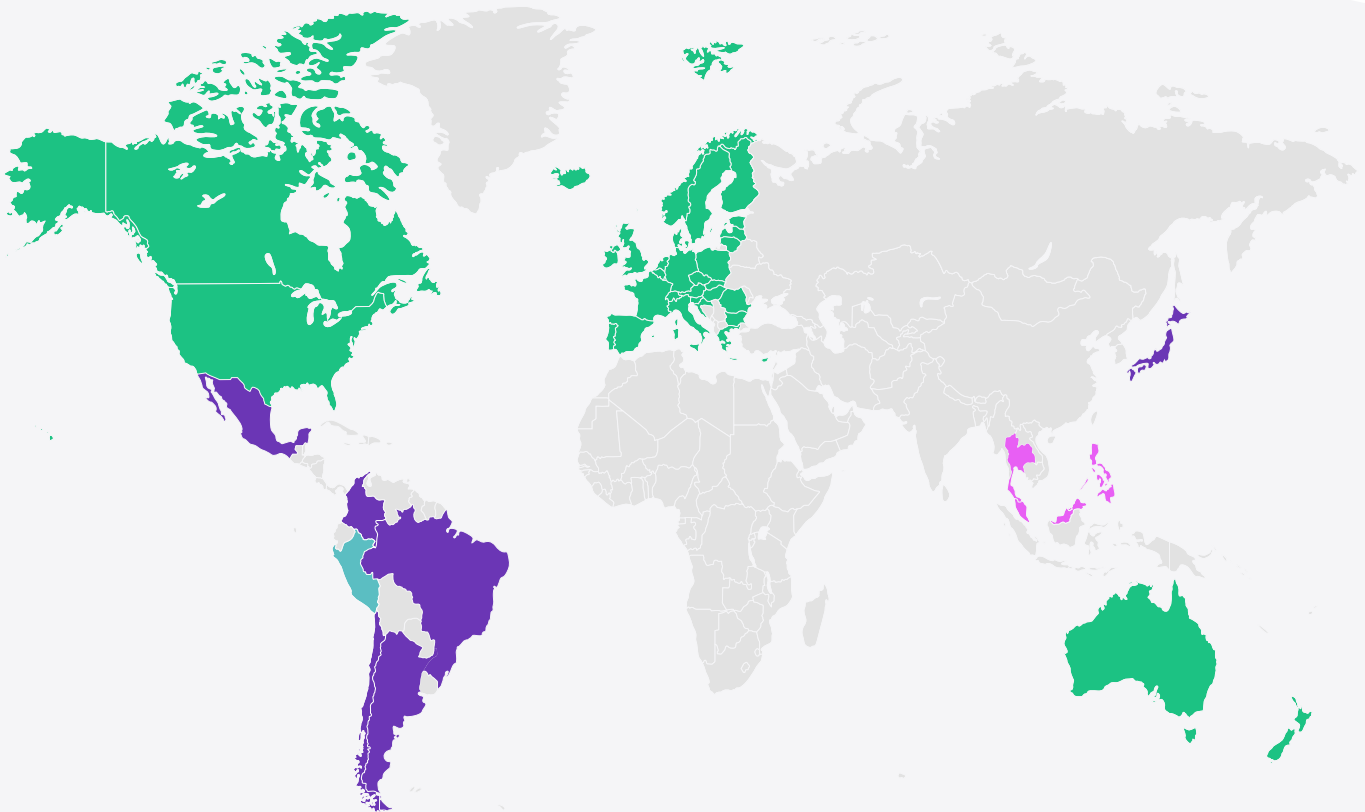

Marqeta Managed

Marqeta Managed provides an open API platform and modern infrastructure for processing card payments at scale, along with full program management services. In this model, Marqeta provides partnerships with issuing financial institutions, card networks, and card fulfillment providers, as well as ensuring that the program complies with applicable regulations and card scheme rules.

Program management services incorporate ownership of regulatory and compliance liabilities of the card program including transaction monitoring, know your customer (KYC), anti-money laundering (AML) compliance, and case and dispute management.

Marqeta's international expansion strategy is driven by demand. We are continuously evaluating new markets and building new partnerships across the globe.

Marqeta's Global Footprint at a Glance

🟢 **Available**
