

MIRKA

## Deeper gloss for darker surfaces.

To achieve deep, hologram free gloss on black or dark surfaces, the polishing compound must be up to the job. The **Polarshine 12 Black** quickly and permanently removes scratches from P2000 or finer, leaving a high gloss hologram free finish. It is especially designed to perform well on dark surfaces such as exposed carbon fiber, so that the material can give its best with a deep dark gloss.

Polarshine. Inspired by nature, respectful of the environment.
