

# Make Your Fleet Operations More Efficient, More Productive, and More Profitable With **Drivewyze PreClear**

*Drivewyze benefits go beyond just the time and money savings. There are many reasons why you will be better off with Drivewyze.*

**Help your drivers go further,** earn more money, and get home sooner. Provide your drivers with a tangible benefit that saves valuable time and creates an overall better driver experience.

**No transponders to install,** replace or inventory. No more \$100 penalties for defective or missing transponders, no more driver down time to install or swap out bypass equipment. Your ELD already has the Drivewyze app installed on it, and can be activated, deactivated and updated over the air.

**Get the most out of on-duty driver time,** and deliver more loads on time, by keeping trucks on the interstate and out of scale lineups.

**Extremely easy for drivers to use,** with little to no training required.

**Drivers LOVE getting bypasses.** Our research shows that drivers are 3 times more likely to work for a company that provides them with a bypass service, and 65% more likely to stay.

**Get the most out of your ELD investment.** Drivewyze not only pays for itself, it improves the rate of return on your already deployed ELD equipment.

**We go to bat for you** with law enforcement. A driver can get pulled over even after a legal bypass. We don't take that lightly. Through solid relationships with law enforcement, we do everything in our power, even providing legal help at our own expense, to get you and your driver off the hook.

**Outstanding customer service.** We know everyone says this, but we mean it. Ask any of our customers and they'll tell you just how positive an experience it is to resolve a problem with Drivewyze.

**Peace of mind reporting.** It's easy to access detailed bypass reporting that shows you how well Drivewyze is serving your trucks and whether there is any need for attention or improvement.

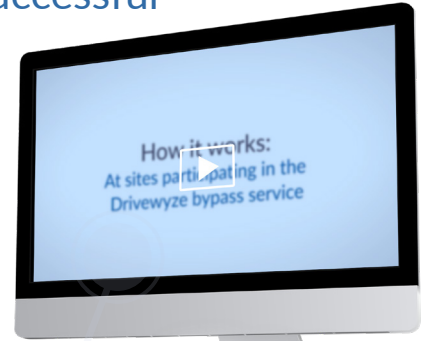

## We're Here to Make Your Drivewyze Investment Successful

We have all the tools and materials you need to get your teams trained on what to expect with Drivewyze – your drivers and dispatch managers, as well as your procurement, finance, safety, and operations teams. This includes instructional user guides, online driver resource pages, presentations and **videos**.→

We also understand that any new technology roll out can be prone to bumps, complaints and even push back stemming from confusion or a resistance to change. Let us help you set expectations with your drivers and other teams.

We'd be happy to jump on a conference call, present at a safety meeting or just speak to a driver or anyone else directly.

Our Customer Success team is standing by to help you roll Drivewyze out in an orderly and efficient fashion, and even help you transition from your old bypass service, if necessary, without getting hammered by “lost transponder” penalties. And our Customer Service team is ready to provide all the help you need to keep your drivers happy and your trucks out of weigh stations.

## What Drivewyze Means to Our Customers

*We had to assign three people to constantly update things with our other [transponder based] weigh station bypass provider. Drivers also expressed some frustrations when roadside transponder readers were not working correctly or when they couldn't maneuver their trucks for their transponders to be read properly in order to get their bypasses. We no longer have to manage and track [transponders], which presented a challenge because our company trucks are based at several different locations.*

John Pope, Chairman, Cargo Transporters

*We're very selective in the technology we use, it needs to have an impact, and it has to be used and consumed. You could have great technology, but if it's complex or hard to use, it won't make a difference.*

*With Drivewyze, we have the best of both worlds with technology that betters our operation.*

Mike Kelley, CTO, Mesilla Valley Transportation

# Drivewyze®

The nation's largest weigh station bypass service.
