

# Make Your Fleet Safer, More Productive, and More Profitable with **Drivewyze PreClear**

*Drivewyze benefits go beyond just the time and money savings. There are many reasons you will be better off with Drivewyze.*

**Enjoy more legal bypasses,** and reduce incidences of accidental scale avoidance. We've mapped almost every weigh station in the country which means drivers receive Heads Up alerts 2 miles in advance.

**Drivewyze works in any lane.** Your drivers don't need to worry about changing lanes in order to get a bypass, or to get into a dangerous lineup that backs up onto the interstate.

**Heads-Up Notifications keep drivers alert.** 2-mile and 1-mile notifications at every weigh station in the country make drivers aware of upcoming sites, avoiding unnecessary violations and aid in your fleet efforts to maintain or lower your safety score

**Peace of mind reporting.** It's easy to access detailed bypass reporting that shows you how well Drivewyze is serving your trucks and whether there is any need for attention or improvement.

**Leverage your hard-earned safety score,** while still maintaining it. The Drivewyze system's small, random pull-in rate means you'll still receive enough clean inspections to keep your score in good standing -- just not so many of them.

**Outstanding customer service.** We know everyone says this, but we mean it. Ask any of our customers and they'll tell you just how positive an experience it is to resolve a problem with Drivewyze.

**We go to bat for you** with law enforcement. Sometimes a driver can get pulled over even after a legal bypass. We don't take that lightly. Through our solid relationships with law enforcement, we do everything in our power - even providing legal help at our own expense - to get you and your driver off the hook.

**Drivers LOVE getting bypasses.** Our research shows that drivers are 3 times more likely to work for a company that provides them with a bypass service, and 65% more likely to stay.

# We're Here to Make Your Drivewyze Investment Successful

We have all the tools and materials you need to get your teams trained on what to expect with Drivewyze – your drivers and dispatch managers, as well as your procurement, finance, safety, and operations teams. This includes instructional user guides, online driver resource pages, presentations and **videos**.→

We also understand that any new technology roll out can be prone to bumps, complaints and even push back stemming from confusion or a resistance to change. Let us help you set expectations with your drivers and other teams.

We'd be happy to jump on a conference call, present at a safety meeting or just speak to a driver or anyone else directly.

Our Customer Success team is standing by to help you roll Drivewyze out in an orderly and efficient fashion, and even help you transition from your old bypass service, if necessary, without getting hammered by “lost transponder” penalties. And our Customer Service team is ready to provide all the help you need to keep your drivers happy and your trucks out of weigh stations.

## What Drivewyze Means to Our Customers

*There's a cost to adding this weigh station bypass service. But I saw the number of hours and the number of inspections Drivewyze could help us avoid. When I took that time savings and plugged in our hourly rate, the potential savings I found that we could get with Drivewyze just blew me away. At that point, it was a no-brainer for me to switch on the Drivewyze weigh station bypass service.*

Wayne Thornhill, Fleet and Safety Compliance Manager,  
Cumberland Farms Transporters

*I was floored when Minnesota State Police CVE Section told us how Drivewyze could help us avoid their weigh stations. They knew we ran a consistently safe operation. So they didn't want their inspectors looking at our trucks every day.*

*Before we got Drivewyze, we would see three or four of our trucks get pulled for visual inspections each month. And anytime that's automatically an hour of down time. With Drivewyze, we don't have that uncertainty anymore.*

Karol Smith, Truck Safety Manager, Barole Trucking
