

# Keep drivers safe and optimize fleet performance. Drive On.

## What is Drivewyze Free?

Drivewyze Free is North America's first and only free safety service for commercial vehicles. This service is our gift to the industry and includes essential in-cab safety alerts and advisories, along with insights to optimize fleet performance, at no cost for an unlimited time.

Drivewyze Free is sponsored in part by state agencies in collaboration with Drivewyze, to provide free safety alerts and advisories to the trucking industry. Drivewyze Free does not include weigh station bypass service and so there is no driver or fleet preclearance data shared with government agencies in order to receive this service.

## Drivewyze Essential Alerts & Advisories

The Drivewyze Essential alerts and advisories are in-cab warnings that prompt your drivers to take action before an incident occurs.

**Essential Alerts:** May require drivers to take action.

### Alerts Include:

Sudden Slowdown, Unexpected Slowdown, Steep Grade, Service Vehicle, Active Work Zones, Brake Check, Low Bridge, Public Service Alerts & Agency Virtual Sign

**Essential Advisories:** Enables drivers to make informed decisions.

### Advisories Include:

Runaway Ramp, Public Service Advisories & Agency Virtual Sign, Rollover, Rest Area

We work with government agencies, safety organizations and data partners to provide two categories of alerts.
