Post Acute Phase Recovery/Repair Protocol

PATIENT PROFILE: Post infection with minimal lingering symptoms, but still in need of support.

PROTOCOL ADDRESSES: Reduction of inflammatory cytokine-provoking antigens with detoxification protocol, modulation of immune response, quenching of free radicals, energy production and membrane repair, mitigation of expressed latent viral conditions.

IMMUNE RECOVERY AND REPAIR PROTOCOL		
Product Recommendations*	Clinical Objective	TAKE 2 TIMES DAILY
PushCatch® Liver Detox	Support phase 2 and 3 liver detoxification via Nrf2 upregulation; Support excretion of inflammatory antigens	1-2 tsp liver sauce Follow 30-45 minutes later with 1-2 packets Ultra Binder® mixed in water
Liposomal Glutathione	Immunomodulator, shields immune cells from oxidation	5 pumps
CBD Synergies-PN	Supports a healthy inflammatory response and associated discomforts	1-2 capsules
NAD+ Platinum®	Replenish NAD+; Support energy production and regulate immune cell signaling	1 tsp
Membrane Mend™	Repair free radical membrane damage	1 tsp
Cat's Claw Elite®	Restore immune strength and vitality and clear out antigens	5 pumps
TIMING:	Recommended length is 28 days with cycle dosing of 5 days on 2 days off. All products should be taken on an empty stomach if possible. Hold liquids in mouth for 30-90 seconds before swallowing. Repeat protocol as needed.	

*Please note that patients may not require all supplements listed.
