CONSTANT VIGILANCE AND PROTECTION

Behind the scenes Transamerica supports key areas of cybersecurity to identify and prevent fraudulent activity:

GOVERNANCE

Our rigorous policies, **training**, and communications meet **industry and government standards** focused on protecting the security and privacy of our customers' information.

IDENTITY MANAGEMENT

We **protect you from fraud** by continually identifying new risks behind the scenes, while making sure you can **access your accounts** securely and conveniently.

FRAUD PROTECTION AND INCIDENT RESPONSE

Our policies and programs are designed to **detect, mitigate, and prevent money laundering, fraud, and financial exploitation**. Around the clock, we monitor for suspicious activity, **analyze, investigate and report** potential fraud. Then, we apply what we learn and strengthen our system to help prevent **future attacks**.

DATA PROTECTION

All data is managed in accordance with sensitivity, business criticality and regulatory requirements. We **protect sensitive data** both in transit and at rest while employing **advanced security** tools used to monitor and protect databases.

APPLICATION SECURITY

To protect the privacy of your information, our technology architecture uses systems and controls designed to **identify, assess, and eliminate potential vulnerabilities**.
