

Attune Workers' Compensation (EverPeak™ Built by Pinnacle)

Workplace Safety Review: Overview for Attune Agencies

Workplace safety reviews

At EverPeak, workplace safety is our top priority. We partner with Builders' safety experts to assess our policyholders' workplaces and identify potential risks. Participation in this review is required for the policyholder to maintain their workers' compensation coverage and ensure their employees' safety and their business's smooth operation.

Participation in this review is required to maintain coverage

Which businesses require a safety review

Class Code	Policy Size		
	<\$3K	\$3K-\$15k	>\$15K
 Hot classes (hazard group A, B)	No safety review		
 Preferred classes (hazard group C, D, E)	No safety review		In-person survey required for some classes (*)
 Non-preferred classes (hazard group F, G)	Phone review	In-person survey	In-person survey

(*) Some Preferred classes will not require a survey regardless of premium, see exception list below.

How the review process works

1. We'll contact the policyholder.

A safety expert from Builders Insurance or another one of our trusted partners (TransStar Technical Services, Inc., Lowry & Associates, Inc., or Midwest Technical Inspections, Inc.) will contact the policyholder to schedule their review

2. We'll ask some questions.

During the review, the safety expert will discuss the policyholder's business operations, including:

- What their business does

- Their worksites
- Use of vehicles
- Use of subcontractors
- Information about their employees
- Equipment and machinery
- Personal protective equipment (PPE)

Please respond to the questions as thoroughly and accurately as you can.

3. We'll provide recommendations

After the review, Builders will email the policyholder personalized recommendations.

- **Suggested recommendations (No action required):** These tips will enhance workplace safety and may even help lower future insurance premiums.
- **Mandatory recommendations (Action required):** The policyholder must implement these recommendations to comply with safety regulations and maintain their insurance coverage. To confirm the changes, they should sign and date the recommendations document and return it via email to Builders.
