

Attune Workers' Compensation (EverPeak™ Built by Pinnacol)

# Loss Control Procedures

## What is Proactive Loss Control?

The goal of Proactive Loss Control is to review workplace safety for certain higher hazard businesses. By providing policy holders an opportunity to review their safety practices with experts, loss control surveys help ensure that policy-holders are operating as safely as possible and minimizing the risk of an injury. The inspector will ask questions, and may schedule an on-site visit. After the inspection, they may provide recommendations based on what they learn.

## What to expect during Proactive Loss Control

- A phone call or email from Builders, or one of their third party surveyors
- Questions about your business and workplace safety practices
- If required, an in-person and/or on-site visit
- Recommendations after the the loss control process

## The interviewer may ask about:

- |                                       |  |
|---------------------------------------|--|
| ▫ Scope of operations                 | ▫ Employee information                   |
| ▫ How the workplace does what it does | ▫ Equipment and machinery use evaluation |
| ▫ Auto exposure data                  | ▫ Use of personal protective equipment   |
| ▫ Subcontractor use and management    | ▫ Jobsite description                    |

They are experts and will provide you with recommendations after the process.

## When undergoing Proactive Loss Control, what is required of the policyholder?

- If and when someone reaches out to conduct a loss control survey, policyholder must respond and provide the requested information in a timely manner.
- If there are substantial recommendations provided, policyholder may be asked to sign and date the recommendations in order to acknowledge receipt
- Coverage is conditional on completing any required loss control survey. Failure to comply may result in cancellation or non-renewal.

## Builders Insurance Third Party Surveyors

- TranStar Technical Services, Inc.
- Lowry & Associates, Inc
- Midwest Technical Inspections, Inc.
