

QUALITY POLICY

Device Technologies is the leading independent medical technology and healthcare company in Australia and New Zealand.

We maintain an effective Quality Management System that is accredited to ISO 9001. We are a growth orientated company that strives to continuously improve our processes, develop expertise in our people and build relationships with our customers.

We are committed to enabling superior health outcomes for patients by providing them with access to the best medical systems available worldwide that fully meet customer expectations and all applicable Regulatory requirements.

A handwritten signature in black ink, appearing to read "Mick Trevaskis", written over a white rectangular background.
