

CourtSide **XCS12** Seat

The Hussey CourtSide XCS12 is the highlight of the CourtSide Seating Collection, the most comfortable bench-style seating option in the marketplace.

Its unique design provides spectators with an individual ergonomically contoured 12" (305 mm) seat on a telescopic seating system.

The CourtSide XCS12 makes a bold design statement in any facility. It provides exceptional comfort and enhanced support with an integral "waterfall" front edge. The unique design of the CourtSide uses dual texturing combined with a curvilinear front seat riser to produce its signature architectural style elements.

The CourtSide XCS12 seating solution is a perfect fit with Hussey's MAXAM™ Telescopic Seating System, providing each spectator a full 21" (537mm) of clear foot space and the best overall comfort and event experience.

Environmental sensitivity is a cornerstone of Hussey's new product design process. The CourtSide XCS12 is manufactured from 100% recyclable materials.

The seat module is manufactured from HDPE (High Density Polyethylene) injected molded plastic. The attachment bracket is 12-gauge steel, used to securely fasten the seat with a metal-to-metal connection to the MAXAM™ Telescopic System for spectator safety and enhanced product performance.

The CourtSide Seating Collection is the perfect choice for any facility looking for enhanced spectator comfort, architectural design appeal, safe, reliable product performance and exceptional value.

CourtSide Comfort

The CourtSide XCS12 is in a comfort class of it's own. A gradual "waterfall" curve on the forward edge reduces pressure to the sensitive region of the thighs regardless of the leg position. Add a Spacer and Backrest for a clearly defined team bench and/or to maximize guest comfort.

CourtSide Style

CourtSide's linear and vertical elements and individual scallop seats enhance look and functionality. Contoured lines provide clear leg and foot space for additional spectator comfort. There's ample room for a "continuous clean sweep" which is important for facility maintenance. The dual texture seat surface is easy to clean & maintain.

CourtSide Custom

Select from any one of our standard, select or custom colors and add seat numbers, row letters or donor plates to help create additional revenue. Incorporate a "Signature Logo" in multiple colors or add the school logo to the end of each row in a new full color graphic application, an exclusive in the CourtSide Seating Collection.
