

MXP

Telescopic Platform

The next generation of telescopic platform seating.

husseyseating[™]
YOUR PARTNER FOR SEATING SOLUTIONS

Introducing MXP, the next generation of telescopic platform seating.

Expertly engineered to safely optimize your facility's operations while providing impressive style and spectator seating comfort, you'll wonder how you ever got along without it.

Hussey gives you the industry's best warranty, factory-trained and certified installation team, factory-backed maintenance, repair and renovation for the actual life of the product. Put all the expertise of your Hussey dealer and all the resources of Hussey Seating™ to work for you.

Flexibility, Safety, Performance & Reliability

The understructure of any telescopic platform is the backbone of the system, and MXP's understructure is engineered to provide maximum flexibility, safety, performance and reliability. Created with high-tensile steel and formed components, MXP achieves an ideal strength to weight ratio that maximizes the systems performance while minimizing wear and tear on the system and your facility.

When it comes to your facility's seating configuration, we know you want the freedom to create just the right blend of customer comfort

and seating capacity. With MXP, the choices are all yours. Utilizing Hussey's proven vertical frame design, MXP accommodates rises from 4"– 24" (102 – 610mm), row spacing from 32"– 36" (813 – 914mm) in 1" (25mm) increments, and tapered sections up to 22 1/2 degrees, providing maximum seating configuration flexibility.

And you can rest easy knowing that whatever configuration you choose, MXP's design and Hussey's commitment to quality deliver the safest telescopic platform in the industry.

Soft-Start Steerable Power

The revolutionary soft-start steerable power system is the most efficient system in the industry, utilizing your existing power source so it's easy on your facility's budget, and even easier to operate. Plus, the controlled start prevents unnecessary wear and tear on the system or your facility.

MXP's unique motor control system allows a single operator to steer the section as it opens and closes to fine-tune its final position. Get a perfect alignment the first time, every time.

Fully Captive Interlocks

Providing the ultimate in safety and performance, fully captive upper and lower interlocks ensure the frames can never separate. Plus, the upper interlocks provide a stable, locked deck when loaded so your audience will feel as safe and stable on the 30th row as on the first.

Tubular Knee Bracing

Designed to withstand heavy use and heavy loads, the tubular knee braces provide a safe, rigid walking surface.

Adjustable Cantilevers

Creating an exceptionally quiet deck and better overall operational performance, the adjustable cantilevers adjust to eliminate friction points during open/close.

Lower Captive Interlocks

The lower interlock design nests completely, permitting a zero-offset between tiers that minimizes the closed footprint of the system. Pre-tension guide rods cannot be bent or disengaged resulting in smooth, reliable operation every time.

Style, Comfort & Functionality

Nose-Mount Up

Accommodating up to a 36" (914mm) premium seat back, your patrons will love the look and feel of MXP. With deeper row spacing, more legroom and our premium upholstered chair options, telescopic seating has never been more comfortable.

Plus, our new chair mounting system delivers the most stable, solid telescopic seating experience available today - one with the feel of a fixed auditorium chair and the flexibility of a telescopic platform seating solution.

Metro Semi-Automatic Seating

Our Metro seats can be configured for true semi-automatic operation of up to 14 chairs at once. The chairs automatically lower as the system is closed and when opened, the operator provides a manual assist to lock the chairs into place.

Premium Series Portable Chairs

For ultimate seating flexibility, choose from our ultra-plush line of Clarin by Hussey Seating portable folding chairs.

1. Contour 2. Club 3. VIP

Nose-Mount Down

Quattro Nose-Mount Seating

Our Quattro nose-mount chairs can be raised and lowered in pairs, with the armrest locking into place providing an exceptionally solid, stable seat.

Forward-Fold Up

Forward-Fold Down

Quattro Forward-Fold Seating

Setup and changeover is fast and easy with a single operator by simply unlocking our Quattro forward-fold upholstered chair rows and raising or lowering up to 14 seats at a time. Gas struts on each seat provide a more controlled and safe setup and changeover.
