

Tablet Arms

Taking form and function to the next level, Quattro's newly designed range of tablet arms – for writing, laptops and more – offer style with highly advanced functionality.

Uniquely designed to be an integral part of the chair, our tablet arms complement Quattro's design lines, stow within the seat space, and feature a proprietary control mechanism for quiet, reliable and safe tablet return. Writing tablet surfaces can even be customized with your choice of surface color to complement your décor.

Installations can also add one of our three tablet arm options at a later date by simply specifying the Quattro arm support for future tablet installation.
