

A CASE STUDY

Classeq Pass Through delivers reliable washing power to

# Surbiton High School.

[classeq.co.uk](http://classeq.co.uk)

A busy school kitchen

**Serving hundreds  
of students and staff  
every day.**

Where reliability matters.

**And downtime  
isn't an option.**

We installed over the  
Christmas period  
to avoid disruption.

The school needed a solution that  
**Improved reliability.**  
**Recovered lost space.**  
**Simplified the working environment.**

Without disrupting service.

⏻ 5 5 ⏩

Two Classeq CP500 machines with water softeners and steam recovery units.

New tabling that optimised the layout without intruding into the room.

Creating better use of the space available.

*“Our previous warewashing machine had become unreliable. It was leaking, struggling to reach temperature and the surrounding extraction and tabling layout took up far more space than it should have.*

*Classeq completely redesigned the wash area, installing two new machines with a much smarter tabling layout that freed up valuable space in the kitchen.*

*The fact the work was completed over the Christmas holidays meant everything was ready to go for the new term with no disruption to service.”*

With our distribution partner we:

- Removed old extraction units.
- Installed chemical lance kits.
- Supplied utensil baskets for larger kitchen items.

Our Distributor Partner:

 **LOCKHART**  
Catering Equipment

The outcome:

- Cleaner, more efficient wash area.
- Improved reliability for daily service.
- A solution designed to support the school's kitchen for years to come.

# The Classeq Pass Through

- Drain pump, rinse booster pump, detergent and rinse aid pumps all fitted as standard.
- Optional steam recovery unit eliminating the need for extraction and creating a more comfortable workspace.
- Utensil wash programme with optional basket for gastronorm 1/1 trays.
- Option to combine two machines to increase wash volumes.
- New models\* now Wi-Fi enabled with access to Clean Connect Portal.
- Range of tabling available, including support for bespoke requirements.

**Clean  
connect.**

WiFi enabled

\*All CP500 models manufactured after 1st February 2026.
