

A CASE STUDY

Classeq Pass Through  
delivers volume for

# Glasgow University Union.

[classeq.co.uk](http://classeq.co.uk)

A thriving, high-volume venue holding

**Student events.**  
**Corporate functions.**  
**Weddings.**

All demanding speed  
and consistency.

While also delivering the daily commitments for the

**Union Kitchen. G12  
Café and three bar  
and club areas.**

The brief was for

**High volume.  
High expectations.  
Fixed Budget.**

How do you scale capacity without disrupting existing operations?

CLASSEQ

⏻ 5 FILLING 5 ⏩

⏻ 5 5 ⏩

With a CP500SR  
Twin Set to maximise  
efficiency and volume.

Including built in  
Steam Recovery units,  
so there's no need for  
additional extraction.

Creating better working  
environments for the  
kitchen team.

*“We needed to replace our rack machine with something simple, reliable and capable of handling high volumes, while fitting both our space and our budget.*

*Classeq provided the perfect solution with a ‘twin-set’ of Pass Through machines that keep pace with our busiest services. The addition of steam recovery units has also made a noticeable difference for the team, improving the kitchen environment while removing the need for additional extraction.”*

With our distributor partner and no disruption to service, we delivered:

- Site Survey and detailed drawings.
- Removal and installation managed.
- Staff training.

Our Distributor Partner:

[classeq.co.uk](http://classeq.co.uk)

The outcome:

- **Increased Capacity.**
- **Working environment improved.**
- **Installation completed with no disruption.**
