

Simple and Affordable Cloud Backup with Atempo Tina 2021 + Wasabi

Today, organizations must manage more critical data than ever before, from a few petabytes to exabytes. Traditional solutions have proven ill-equipped to keep up with these demands. To ensure these increasing volumes of critical information are always securely backed up, organizations require new advanced data protection capabilities.

Atempo simplifies the protection, management, and archiving of digital assets on any platform, across any infrastructure over any period of time. The Atempo product Tina provides comprehensive backup and restore functionality across multiple platforms, whether physical or virtual, including application data, databases, NAS, and the Office 365 suite. Data can be seamlessly sent to Wasabi hot cloud storage using Tina, giving your business access to a bottomless vault of inexpensive, reliable cloud storage.

Easy-to-use, Scalable Data Backup And Recovery

Tina combined with Wasabi hot cloud storage infrastructure provides a secure, scalable and affordable solution for data protection in the cloud. Tina offers an advanced, high-performance protection for heterogeneous environments. Powerful and easy to use, Tina makes it easy to manage enterprise data throughout its lifecycle and meet critical business requirements, from digital privacy and regulatory compliance to long-term archiving. Tina Data Protection platform orchestrates all large data protection requirements to Wasabi's S3 infrastructure. Tina enables manual and automatic tasks to simplify access and lower storage costs.

The solution is highly scalable and designed to meet the data growth requirements of your business. Tina represents the most efficient, reliable, and flexible way to protect critical business information. Because organization needs are constantly evolving, Atempo provides major updates to the Tina product with new features added regularly. Wasabi's infinitely scalable storage can also change to fit the needs of your business. Your storage capacity grows with your data usage. There is no equipment to buy, hardware to upgrade, or limit on how much you can store.

The last two decades have witnessed the arrival of major changes such as virtualization, the cloud, hybrid architectures. Tina's security integrations and open format approach mean that data stored on the Wasabi Cloud is safe, accessible, and rapidly recoverable. Data stored on Wasabi boasts 11 nines of data durability, with support for immutable WORM buckets. Wasabi storage is also compliant with major security standards like HIPAA, FERPA, CJIS, and more.

KEY FEATURES

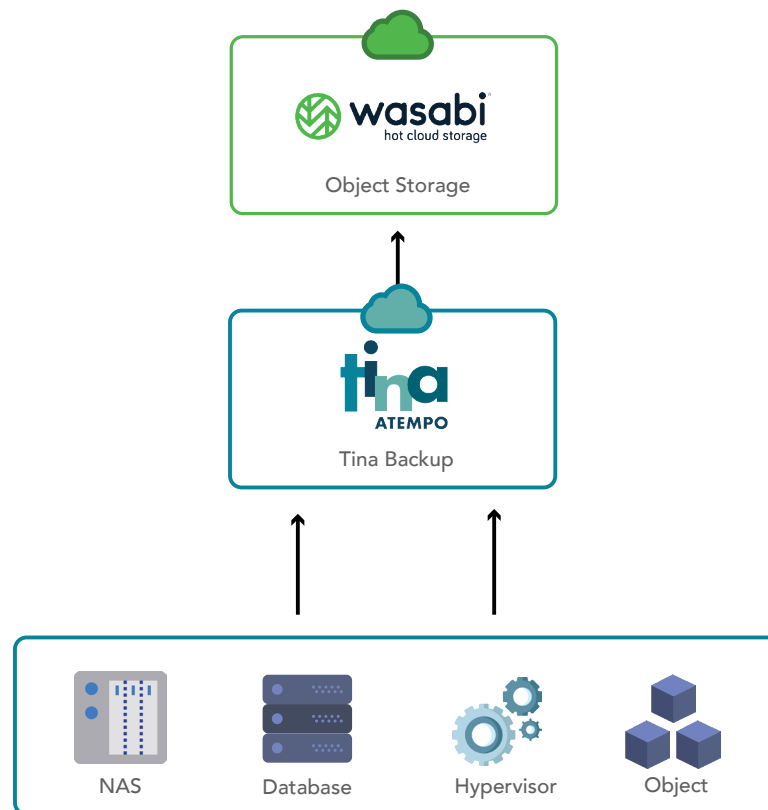

- Ultra-low-cost cloud storage for any purpose
- Easy-to-use file management and data protection tools
- Seamless integration and operation
- Fast and reliable cloud backup and recovery for diverse operating systems, hypervisors and hardware platforms

BENEFITS

- Slash storage and data protection cost and complexity
- Simplify setup and administration
- Accelerate backup and recovery cycles
- Reduce risk and exposure due to data loss
- Protect against equipment failures, disasters, human error, ransomware and malware

About Atempo

Atempo is a leading independent European-based software vendor with an established global presence providing solutions to protect, store, move and recover all mission-critical data sets for thousands of companies worldwide. With over 25 years' experience in data protection, Atempo offers a complete range of proven solutions for physical and virtual servers backup, workstations and migration between different storages of very large data volumes. Atempo's three flagship solutions, Lina, Miria and Tina are labeled "As used by French Armed Forces" and "France Cybersecurity". Selected to join the French Tech 120, a government program designed to nurture 25 unicorns by 2025, Atempo is headquartered in Paris and is present in Europe, the US and Asia with a partner network in excess of 100 partners, integrators and managed service providers.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an infinite amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi has secured \$140 million in funding to date and is a privately held company based in Boston.
