

Cut your CDN costs and increase performance with G-Core Labs and Wasabi Hot Cloud Storage

Meet customer needs and grow your business faster around the globe with an integrated G-Core Labs and Wasabi solution.

Traditional on-premises storage platforms and first-generation cloud storage services are too costly and complicated for the new challenges of the digital era. Delivering bandwidth-intensive, delay-sensitive content over the public Internet can result in poor user experiences and frustrated customers.

G-Core Labs and Wasabi are partnering to help companies break down infrastructure barriers and improve performance of delivery. By using superfast global CDN and storage now you can quickly scale and develop your web projects abroad. To simplify the provisioning and usage monitoring of the Wasabi service, G-Core Labs is leveraging Wasabi's Partner API. This API allows a G-Core Labs customer to provision and monitor their Wasabi storage resources from the G-Core Labs management portal. This integration also allows for a single bill that contains CDN and Wasabi cloud storage services.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi hot cloud storage is easy to understand, easy to order and incredibly cost-effective to scale. With Wasabi there are no confusing cloud storage tiers to decipher and no complicated fee structures to decode. One product with predictable and straightforward pricing supports virtually every cloud storage application.

There's no more need to decide how and where to store your data, saving you countless hours (and consulting fees) so you can focus on growing your business instead of engineering and calculating data storage tiers and forecasting (or fearing) unpredictable hidden data egress and API request fees.

G-Core Labs CDN is a Content delivery network with first-class performance for excellence in any market

G-Core Labs have built their own network to meet the challenge of delivering any content globally at peak loads on the system. Their Guinness World Record awarded infrastructure has been tested for reliability by a million users playing simultaneously.

G-Core Labs CDN is an all-in-one solution for delivering any entertainment content. Advanced features, comfortable dashboard, flat pricing worldwide and multi-language technical support allow to deliver any heavy content in optimal fashion around the globe.

KEY FEATURES

- Seamless integration between CDN and cloud storage with direct peering between G-Core Labs and Wasabi
 - single billing
 - no network egress fees
 - no transfer fees
- Content security
- Reduced server load
- High reliability

BENEFITS

- Slash costs and complexity
 - predictable pricing
 - reduce capital and operating costs
- Optimize application performance and reliability
- Improve user experiences and customer satisfaction
- Grow faster globally

G-Core Labs CDN is approved by games publishers, software developers, online banking and stores, telecom, media, and other high load services.

Global Presence	Performance	Content Protection
50+ PoPs 200+ nodes 5,000+ peering partners 1,000+ customers	≤30 ms average response time 3,5+ Tbps daily traffic 10+ Tbps network capacity	Access policies (by IP, country, referrer, user agent) CORS method Secure token

G-Core Labs CDN has the largest menu of cutting-edge features

Free features	Paid features
Support for all the required protocols HTTP/2 SSL IPv6 Flexible CDN settings API Origins group Prefetch Cache settings Purge Rules	Advanced analytics Geostatistics, statistics by requests, statistics by applications and devices. Available for one or more resources. Origin shielding Additional origin source protection against high load. Raw logs Full access to CDN resource logs.

Why is an integrated solution is better?

The tightly integrated solution provides extremely fast, cost-effective and scalable content storage and delivery for the cloud-first, mobile-first world.

You can use G-Core Labs CDN and Wasabi to store and distribute content quickly and cost-effectively. Wasabi can be used as a G-Core Labs CDN origin server, interfacing directly with the CDN via Wasabi's S3 API. The integrated solution improves user experiences by caching static content at the edge of the network closer to the user.

About G-Core Labs

G-Core Labs is the powerful edge and cloud solutions provider for the entertainment industry and media: global hosting, content delivery network, media platform, DDoS protection, cloud, custom software development, IT infrastructure management. Trusted by Wargaming, RedFox Games, Bandai Namco, Joom, Exit Games, Tinkoff. <https://gcorelabs.com/>

ABOUT WASABI

Wasabi is the hot cloud storage company delivering disruptive storage technology that is 1/5th the price of Amazon, faster than the competition, and features no fees for egress or API requests. Unlike first generation cloud vendors, Wasabi is solely focused on providing the world's best cloud object storage service. Created by Carbonite (Nasdaq: CARB) co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the cloud storage industry. Wasabi is a privately held company based in Boston, MA.
