

Streamline Medical Image Management with Ambra Health and Wasabi

Unleash Cloud Economics, Scalability and Agility

Medical image data growth is exploding, creating operational and financial challenges for many healthcare organizations. Managing, sharing and protecting medical images can be a manually intensive, time-consuming, costly proposition that impairs patient care and hampers business performance.

[Ambra Health](#) and [Wasabi](#) have partnered to help healthcare providers streamline image management, simplify operations and reduce expenses. Ambra Health customers can now archive medical images and data to Wasabi for ultimate economics, agility and protection.

Ambra Health's cloud-based platform significantly improves medical image management processes and workflows, making images and data easily accessible to all, from anywhere, on any device, in real time. And Wasabi hot cloud storage, the industry's most affordable and fastest-performing cloud storage service, is perfect for maintaining today's massive medical image libraries.

The integrated solution reduces medical image management cost and complexity, helping hospital systems, medical groups, imaging centers and clinical research organizations simplify workflows, improve patient outcomes and boost business results.

Ambra Health Suite Transforms Medical Image Management

From large health systems to small private practices, Ambra Health improves medical image management across the entire care network—reducing costs, improving agility and optimizing patient care.

Ambra's cloud-based PACS, VNA, Enterprise Image Exchange and DICOM web viewer solutions make it easy to securely load, share and view images. The Ambra suite supports a wide range of imaging types including MR, CT, PET, CR, US, and MG. And you can use the solution to image-enable EMR and EHR systems to improve teamwork and coordination within and between networks.

Flexible, scalable and interoperable, the Ambra platform can be integrated and deployed with uncommon speed to deliver intuitive solutions that facilitate internal adoption, strengthen collaboration and significantly improve business outcomes.

Wasabi Delivers Breakthrough Cloud Storage Economics and Performance

Wasabi hot cloud storage is the industry's lowest-cost and highest-performing cloud storage service. The ideal medical imaging repository, Wasabi is 1/5th the price of Amazon S3 and faster than the competition with no fees for egress or API requests. Wasabi is built on a highly parallelized system architecture that delivers breakthrough performance, so you can rapidly move large medical images in and out of the cloud, without the price penalty of most public cloud storage providers.

KEY FEATURES

- Versatile cloud-based image management with EMR/EHR integration
- Instantly and infinitely scalable cloud storage
- Seamless integration and operation
- Robust security, reliability and durability

BENEFITS

- Increase physician and clinician productivity, improve patient outcomes and boost business results
- Avoid on-premises equipment cost and complexity
- Tightly align ongoing operating expenses with evolving business requirements
- Mitigate risk and exposure

You can use Wasabi to store medical data in accordance with HIPAA/HITECH privacy regulations. Wasabi supports comprehensive user authentication and access control mechanisms to prevent unauthorized data disclosure. In addition, all data stored on Wasabi is encrypted to protect data at rest, and all communications with Wasabi are encrypted to protect data in transit.

Wasabi safeguards the integrity of medical images and electronic health records, satisfying stringent healthcare industry data retention requirements. Wasabi provides eleven 9s of object durability, protecting data against hardware failures and media errors. An optional object immutability capability protects data against administrative mishaps, malware and ransomware; preventing data from being deleted or modified by anyone—including **Wasabi**.

About Ambra Health

Ambra Health is a medical data and image management SaaS company. Intuitive, flexible, scalable and highly interoperable, the Ambra cloud platform is designed to serve as the backbone of imaging innovation and progress for healthcare providers. It empowers some of the largest health systems such as Memorial Hermann and New England Baptist Hospital as well as radiology practices, subspecialty practices and clinical research organizations to dramatically improve imaging and collaborative care workflows. As expert partners, we listen to our customers, understand their needs, and apply our extensive knowledge to deliver innovative medical image management solutions for the future of healthcare, now. Discover what the Ambra medical imaging cloud can do for you at www.ambrahealth.com.

Extremely Agile, Scalable and Economical Image Management

ABOUT WASABI

Wasabi is the hot cloud storage company delivering disruptive storage technology that is 1/5th the price of Amazon S3 and faster than the competition with no fees for egress or API requests. Unlike first generation cloud vendors, Wasabi focuses solely on providing the world's best cloud storage platform. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
