

Unleash Cloud Freedom and Economics with Scality Zenko and Wasabi

Leverage Multi-Cloud Data Management to Align Costs with Data Value

Data growth is spiraling out of control, creating financial and operational challenges for many companies. Many organizations are looking for innovative ways to optimize storage resources and balance expenses.

Wasabi has partnered with Scality Zenko to help businesses reduce storage expense and complexity, and better align storage costs with data value. Wasabi hot cloud storage is incredibly affordable and fast cloud object storage for any purpose. And Zenko is a multi-cloud data controller that enables you to protect, process and search data regardless of location—on-premises or public cloud.

The integrated Zenko and Wasabi solution provides a unified, multi-cloud storage repository for ultimate economics, agility and choice. Application developers can use the combined solution to easily incorporate cloud storage into their apps. And end-customers can use the integrated solution to reduce storage costs and improve data protection and mobility.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics And Performance

Wasabi hot cloud storage is the industry's most affordable and highest-performing cloud storage service. Wasabi is 80% cheaper and up to 6x the speed of alternative cloud storage services like Amazon S3.

Specifically conceived to make cloud storage a commonplace utility like electricity, Wasabi hot cloud storage is easy to understand, easy to order and incredibly cost-effective to scale. With Wasabi there are no confusing cloud storage tiers to decipher and no complicated fee structures to decode.

Engineered for extreme data integrity and security, Wasabi provides eleven 9s object durability and supports configurable data immutability to protect against accidental deletions, ransomware and viruses. A parallelized system architecture delivers breakthrough performance, so you can rapidly move large datasets in and out of the cloud.

Zenko Streamlines Data Management And Control Across Storage Clouds

Zenko Multi-Cloud Data Controller unleashes the power of multi-cloud storage, helping you eliminate vendor lock-in, improve resiliency and optimize costs. Zenko presents the application with standardized and unified interfaces

KEY FEATURES

- Highly flexible multi-cloud data management and storage for any application
- Seamless integration and unified administration and management
- Ultra-low-cost primary storage for cloud-based applications
- Affordable and reliable secondary storage for backup and recovery
- Durable storage for archival and compliance

BENEFITS

- Slash storage cost and complexity
- Align storage expenses with data value
- Eliminate vendor lock-in
- Accelerate time-to-market
- Ensure continuous availability and avoid data loss

across clouds to streamline integration and accelerate time-to-market. Zenko also provides a policy-based engine for automated data management and processing including replication, migration, lifecycle and other cloud data workflows. Finally, Zenko includes efficient metadata search capabilities that let you quickly parse large datasets based on simple business terms.

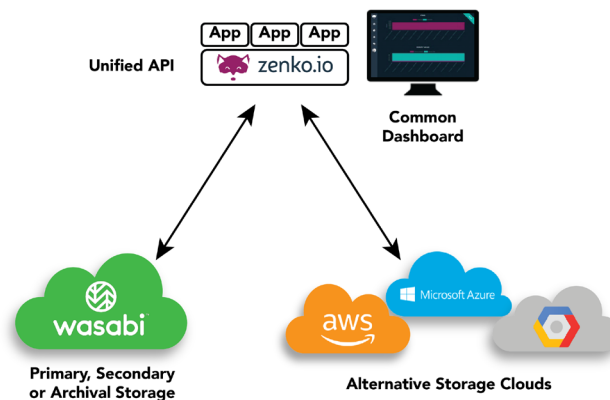

Zenko Orbit is a cloud-based portal that streamlines data management and simplifies operations. With Zenko Orbit you can administer multiple cloud storage accounts, credentials and policies in a uniform fashion. A unified dashboard provides individual and aggregated cloud performance and usage stats, helping you monitor the health and status of your hybrid storage infrastructure. A point-and-click administrative interface makes it easy for IT generalists, cloud application developers or DevOps staff to replicate data across clouds for data protection or disaster recovery.

Versatile Solution Supports A Variety Of Applications

The integrated Wasabi-Zenko solution delivers superior economics, flexibility and simplicity, supporting a wide range of use cases:

- Use Wasabi hot cloud storage for affordable and fast primary storage for cloud-based applications.
- Use Wasabi hot cloud storage for cost-effective secondary storage for backup, disaster recovery or data migration.
- Use Wasabi hot cloud storage for low-cost and reliable archival storage for compliance and long-term data retention.

Monitor and control the multi-cloud infrastructure as a unified storage repository for ultimate efficiency and ease-of-use.

Create a Unified, Multi-Cloud Storage Repository with Zenko and Wasabi

ABOUT WASABI

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage. Wasabi is 80% cheaper and up to 6x faster than Amazon S3, with 100% data immutability protection and no data egress fees. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
