

Improve Data Protection and Mitigate Risks with Versity and Wasabi

Automatically Archive Data to the World's Most Affordable Storage Cloud

Skyrocketing data growth is creating operational and financial challenges for many IT organizations. Many companies are struggling to safeguard data against equipment failures, disasters and ransomware. Legacy data management solutions and storage platforms are too slow, expensive and inefficient for the digital era.

Wasabi has partnered with [Versity](#) to help businesses improve data protection, mitigate risks and reduce expenses. Wasabi hot cloud storage is extremely fast and affordable cloud object storage for any purpose. And Versity Storage Manager (VSM) is a large-scale archive data management tool for cost-effectively protecting massive data collections on any mix of on-premises and cloud-based storage platforms. The integrated solution lets you archive critical applications and business data to the world's lowest-cost storage cloud—quickly and efficiently.

With Versity and Wasabi you can lower TCO and extend previous on-premises storage investments and avoid disruptive time-consuming migrations. VSM can manage existing on premises data and concurrently use Wasabi for new initiatives. Transitioning applications to Wasabi over time is easy and you can gradually decommission legacy tape libraries or storage arrays on your own terms.

Versity Storage Manager Protects Massive Data Libraries

Versity Storage Manager is a next-generation scale-out archive data broker that delivers unmatched performance and economics. The solution interfaces with existing enterprise business applications and backup solutions, making it easy to expose low-cost archival storage resources like Wasabi hot cloud storage to end users. Rich and flexible archive policies coupled with optimal grouping and packaging optimize the flow of data both in and out of cloud storage services and archival storage devices such as tape libraries, disk arrays and on-premises object storage systems. VSM brokers data across a diverse mix of archival storage systems, enabling customers to optimize performance, reliability and costs for different types of data and different users, while always maintaining independence from storage hardware vendors and cloud providers.

KEY FEATURES

- Automatic, policy-based archiving
- Ultra-low-cost secondary cloud storage for data protection
- Durable cloud storage for long-term data retention and compliance
- Seamless integration and operation
- Minimized number of connections and maximum performance

BENEFITS

- Reduce risk and exposure due to data loss
- Tightly align storage costs with data value
- Reclaim expensive primary storage capacity
- Eliminate vendor lock-in
- Protect and extend previous investments

Wasabi Delivers Breakthrough Cloud Storage Economics

Wasabi hot cloud storage is the industry's most affordable and highest-performing cloud storage service. Wasabi is 80% cheaper and up to 6x the speed of alternative cloud storage services like Amazon S3, with no egress fees or API charges.

Specifically conceived to make cloud storage a commonplace utility like electricity, Wasabi hot cloud storage is easy to understand, easy to order and incredibly cost-effective to scale. With Wasabi there are no confusing cloud storage tiers to decipher and no complicated fee structures to decode.

Engineered for extreme data integrity and security, Wasabi provides eleven 9s of object durability and supports configurable data immutability to protect against accidental deletions, ransomware and viruses. A parallelized system architecture enables exceptionally fast data retrieval and analysis.

Intelligent Archival with Groundbreaking Economics and Performance

About Versity

Versity is the only independent provider of advanced, scalable, high throughput software defined archiving storage technology products. Organizations leverage the Versity Storage Manager to implement data preservation strategies for long term storage, and retrieval of massive data stores both on premise and in the cloud. Versity serves customers in North America, Europe, India, and the Middle East including leading public and private entities in financial services, education, research, aerospace, energy, entertainment, web services, and publishing.

ABOUT WASABI

Wasabi is the hot cloud storage company delivering disruptive storage technology that is 1/5th the price of Amazon S3 and faster than the competition with no fees for egress or API requests. Unlike first generation cloud vendors, Wasabi focuses solely on providing the world's best cloud storage platform. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is on a mission to commoditize the storage industry. Wasabi is a privately held company based in Boston, MA.
