Wasabi and Tintri IntelliFlash Provide Seamless Hybrid Cloud Data Mobility

IT departments are increasingly challenged to deliver storage performance, scalability, and capacity while keeping CAPEX and OPEX in check. Enterprise workloads such as databases and their associated applications, server and desktop virtualization, and real-time analytics are driving demand for intelligent infrastructure that can keep up with changing storage dynamics in the data center.

Tintri IntelliFlash is the workhorse for your applications; a product with both performance and analytics capabilities to put your data to work. Combined with Wasabi hot cloud storage, Intelliflash customers can increase data protection and availability.

Tintri IntelliFlash Transforms Data into Action

Tintri IntelliFlash offers a flexible solution to tackle any and all data center needs. Whether you need the exceptional performance of NVMe-flash, the sustained performance and high density of SAS-flash or an optimal balance of performance and capacity offered by a hybrid system, the IntelliFlash portfolio can cost-effectively satisfy all these requirements. IntelliFlash understands the inherent characteristics of disparate storage media and intelligently manages data placement to deliver optimal performance at low latency with the best possible economics. It also includes advanced data services, multiprotocol support, flexible management, and intelligent analytics, enabling you to maximize uptime, consolidate workloads, and simplify storage administration.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

IntelliFlash comes bundled with the Tintri Cloud Connector, which allows customers to replicate snapshots to Wasabi's cloud for offsite storage. The IntelliFlash Cloud Connector supports backing up local snapshots to Wasabi or quickly migrating volumes for bring-up on the cloud. This seamlessly extends private cloud data resources to the cloud for better data center storage economics. Wasabi's storage is 1/5th the cost of Amazon S3 with no fees for egress or API requests while remaining markedly faster than AWS. Tintri customers can bolster their data protection with remote cloud storage that boasts 11 nines of data durability.
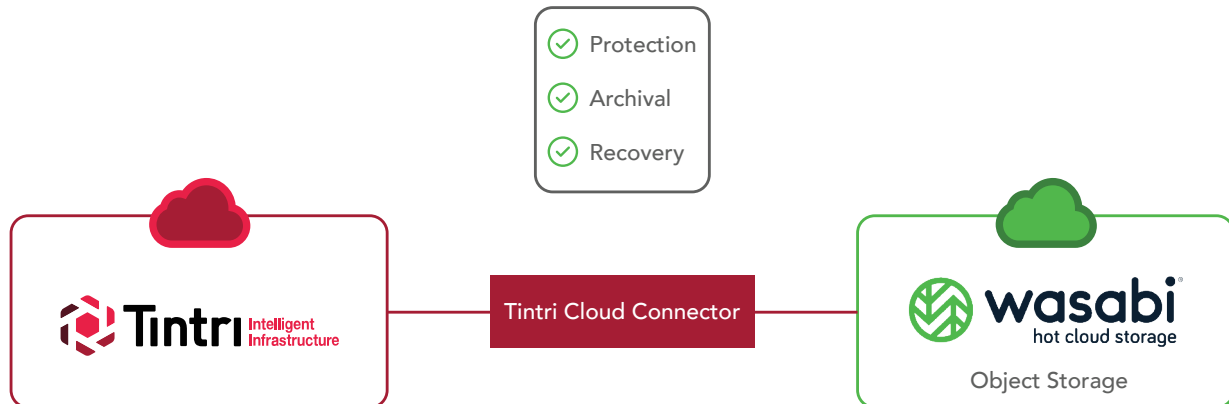

KEY FEATURES

- Integration with popular database services
- Integrated Cloud Connector
- Capacity without compromising on performance
- Low-latency
- Advanced analytics tools

BENEFITS

- Easy to Manage, Intelligent data management
- Best in class performance
- Hybrid Cloud – Backup local snapshots to the cloud
- Lower storage costs

Enterprises utilizing a private cloud, for example, can extend data resources to the public cloud for greater overall capacity and improved economics.

About Tintri

Based in Silicon Valley, Tintri is a wholly owned subsidiary of DataDirect Networks (DDN), the data-at-scale powerhouse and world's largest privately held storage company. Tintri delivers unique outcomes in Enterprise data centers. Tintri's AI-enabled intelligent infrastructure learns your environment to drive automation. Analytical insights help you simplify and accelerate your operations and empower data-driven business insights. Thousands of Tintri customers have saved millions of management hours using Tintri. Choose differently, the choice is yours. Learn more about the Tintri portfolio of solutions at https://www.tintri.com/products.
