

Unify Disparate Sources of Data with Precog & Wasabi

As the amount of data increases, so does its dispersion. The modern enterprise may have critical data stored on an array of storage devices across mediums: LTO tape, NAS systems, public clouds, and laptop hard drives, not to mention application data. How can today's businesses tackle this data diaspora while allowing users to create and use their data as organically as they want?

Precog is a no code solution that lets any user ingest data from any data source, including thousands of SaaS applications, APIs, DBs, NoSQL DBs and more into their Wasabi account. Create an analytics ready data lake with no data engineer or technical skills required. Precog also lets users connect their Wasabi accounts directly to any Business Intelligence or Machine Learning tool including Tableau, PowerBI, Looker, Qlik, DataRobot and many more. Get more value from your Wasabi data!

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all files "hot" so it can be accessed in milliseconds. All Precog and Wasabi customers can treat their data as hot, so they can shorten upload windows and quickly access their files for faster retrieval times and more efficient analysis.

Data Management and Instant Analytics with Precog & Wasabi

Precog boasts an easy to use data browser interface for exploring your Wasabi data which lets anybody find the key information they're looking for and use it immediately. Any user is also capable of adding additional sources to Precog with no coding required.

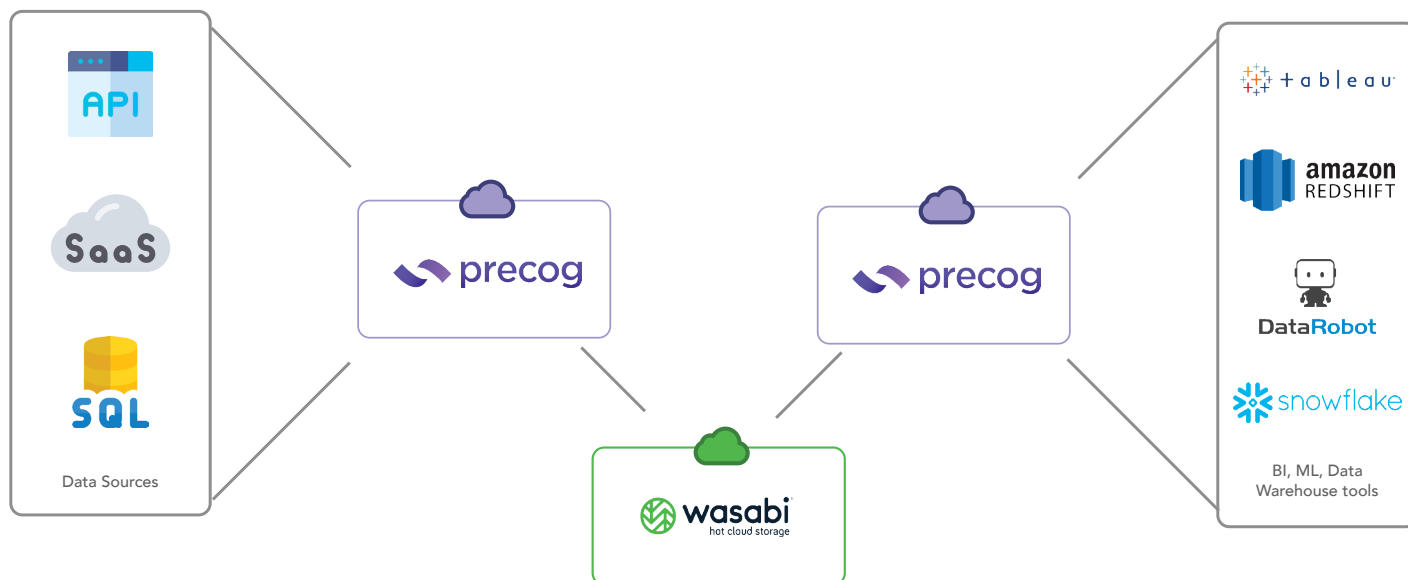

Users are also able to quickly and easily perform analytics on their Wasabi data. Precog acts as a bridge between Wasabi and numerous analytics platforms including Snowflake, Tableau, DataRobot and many others. Through a single-pane-of-glass, users can both manage their data across multiple sources, ingest data into Wasabi, and perform analytics on that data.

KEY FEATURES

- Seamless integration with analytics tools
- Low-cost, high performance data storage
- Instantly load any application or API data into Wasabi without data engineering resources
- No code approach for working with all your Wasabi data

BENEFITS

- Cost effective data access for any user
- Easily load any data into Wasabi
- Leverage Wasabi performance for fast insights
- Turn your Wasabi data into an analytics ready data lake instantly

Load any data to Wasabi and perform instant analytics

About Precog

Precog is rethinking what's possible with complex data transformation. Data has become increasingly large and complex, end users have been cut off, and the data engineer has become paramount. Precog is changing this and giving access and control back to the end users and business teams. Built by a global team spanning four countries, and supported by our customers and partners we will continue to push the boundaries of both ease of use and hyper performance for transforming massive complex data sets into ready to use analytic data tables for any application.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an infinite amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by customers worldwide, Wasabi has been recognized as one of technology's fastest growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi has secured \$140 million in funding to date and is a privately held company based in Boston.
