

Bringing secure backup & IT management solutions with affordable hot cloud storage to MSPs and IT pros

A reliable backup software platform and a flexible, scalable, and highly cost-effective storage solution

MSP360 Managed Backup is an easy-to-use backup solution with centralized management, monitoring, and reporting. The platform is natively integrated with Wasabi hot cloud storage to enable best-in-class data protection for Windows, Linux, macOS, VMware, Hyper-V, Microsoft 365, and Google Workspace.

Features

- Backup and storage with immutability and Object Lock
- Seamless integration and operation
- Affordable and secure full data protection solution
- Full-service suite includes built-on monitoring and reporting options

Benefits

- One platform for all your IT management needs
- Simplicity & flexibility with Bring-your-own-storage and unified billing options
- Predictable pricing with no charges for egress or API requests
- Simplified backup flow through a single interface

Wasabi and MSP360 provide simple & flexible cyber protection

With multiple options for combining these solutions (bring-your-own-Wasabi or unified billing), you have a choice in how you take advantage of all the features and integrations.

Immutability with object lock is the highest level of backup protection possible. Immutable backups are not prone to ransomware, unattended access, or human factors. With MSP360 Managed Backup, immutability is supported for Wasabi and can be enabled in the MSP360 Managed Backup Control Panel.

Get full protection of all your data with Wasabi & MSP360

Wasabi partners with MSP360 to help businesses eliminate storage and data protection cost and complexity and keep pace with skyrocketing data growth.

Whether you're backing up simple files and directories or need to perform backup for virtual machine images, databases or a service like Microsoft365 or Google Workspace, MSP360 and Wasabi have you covered.

Cost-efficiency for internal IT teams and profitability for MSPs

Wasabi Hot Cloud Storage and MSP360 Managed Backup empower MSPs to enhance profitability while driving cost efficiency for internal IT teams. With Wasabi's affordable, high-performance storage—featuring no egress fees—and MSP360's streamlined backup and recovery solutions, MSPs can deliver secure, cost-effective data protection services. This combination enables MSPs to achieve higher margins by offering robust services at lower costs, while IT teams benefit from simplified management and predictable budgeting.
