Achieve Total Data Visibility with Veritas Enterprise Vault's Intelligent Archiving & Wasabi Hot Cloud Storage

The need for information visibility extends far beyond e-mail. The proliferation of digital communications—from social media, to instant messaging, to collaboration tools—means that an archiving solution must support many different content sources and must continue to evolve as quickly as the digital world does. Internal Audits, HR requests, regulatory compliance, supervision, and legal cases require a central repository, which allows you to be more proactive and prepared when it comes to discovery.

Veritas Enterprise Vault has enabled tens of thousands of customers to better store, manage and discover their email, social media, messaging and electronic files, and by partnering with Wasabi, Veritas customers can take advantage of disruptive price and performance when storing their assets in the cloud.
