

Wasabi Hot Cloud Storage with Vinchin Backup & Recovery

Modernize data protection plans with next-generation backup software and cloud storage

What is Vinchin Backup & Recovery?

With the destructive power of cyberattacks growing along with time, data protection cannot emphasize its importance enough in today's digital world. Also in recent years, more strict legal policies regulating data processing, data storage, and data retention in organizations also make their way to better supervise the business market, modern business change-makers are now driven by both sides to prior the safety of IT infrastructure above anything else.

Vinchin is a professional provider of data protection solutions for enterprises. It provides a series of data backup, instant recovery, and offsite DR solutions for private cloud, public cloud and hybrid cloud environments.

Vinchin Backup & Recovery, the next-generation VM backup solution self-developed by Vinchin, supports the world's most mainstream virtual environments including VMware, XenServer/XCP-ng, Hyper-V, RHV/oVirt, OpenStack, Sangfor HCI, Oracle Linux Virtualization Manager and Huawei FusionCompute(KVM). It prevents the loss of critical business data due to a variety of factors like human misoperation, ransomware attacks, hardware failures, or natural disasters.

Why Vinchin and Wasabi Are Better Together

To protect against modern threats, Vinchin and Wasabi have partnered to pump new energy into Vinchin's all-in-one backup and recovery solution for best 3-2-1 backup practice, where cloud storage can perform as the last but critical destination for backup data. The combination works to provide customers with easy access to the cloud for more flexible and disaster-proof data protection.

Vinchin Backup & Recovery integrates S3 APIs of reliable and most-chosen cloud storage, including Wasabi, to help you easily archive important legacy backups from local server to cloud through a single pane of glass. You can customize the automatic cloud archive plan with flexible schedules, and setup a user-defined retention policy for the archive data to achieve effective and space-saving long-term data storage. Fast restores of the archive data are also available anytime, anywhere without egress fees for you to meet disaster recovery or specific data retrieval scenarios.

KEY FEATURES

- Archive Vinchin backups automatically to Wasabi for reliable long-term data retention
- Prevent data loss from local disaster by saving data to the cloud
- Easily restore data from cloud to local production environment with no fees

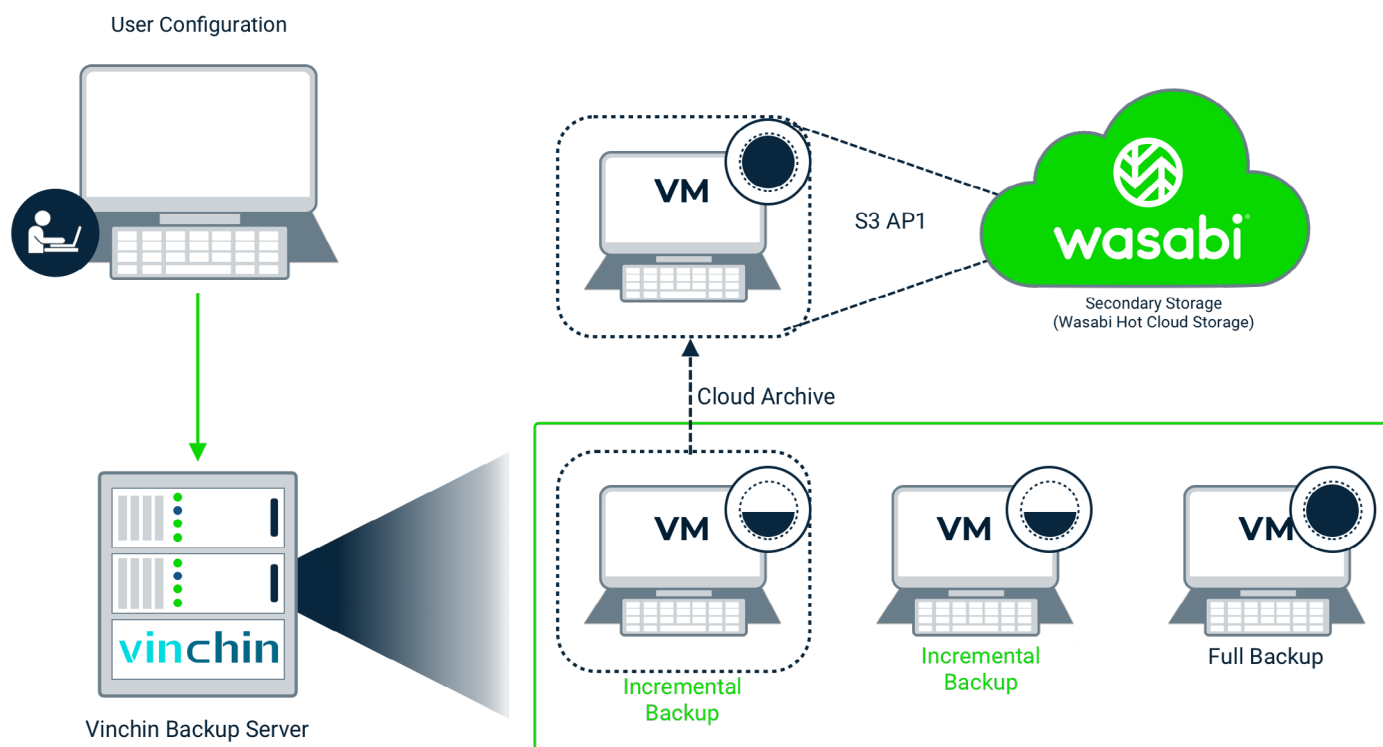

BENEFITS

- Scale out data protection architecture with higher flexibility and availability
- Lower deployment and maintenance cost for cold data storage
- Better comply with legal regulations like General Data Protection Regulation
- Simplify IT operations for cloud archive management

By using Vinchin Backup & Recovery with Wasabi hot cloud storage, the agility of your backup architecture can be stretched to a full extent, which will work together to empower your mission-critical IT workloads to be more flexible and available. Backups stored with Wasabi are always available and organizations can exercise a backup recovery without incurring any fees.

About Wasabi

Wasabi is a public cloud object storage service that is 1/5th the price of AWS S3 and faster than the competition with no fees for egress or API requests. Wasabi provides 11 x 9s of data durability, high system availability, and support for immutable storage buckets. Wasabi is fully compatible with the AWS S3 API with support for hundreds of S3-compatible storage applications, including Vinchin, and has been certified for compliance with enterprise security and privacy standards.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
