

Powerful Data Insights and Cost-effective Cloud Object Storage with Snowflake & Wasabi

What is Snowflake?

Snowflake is an enterprise-ready cloud data warehouse that simplifies leveraging data for unlimited business insights. Snowflake's Data Cloud platform provides organizations mobilization with near unlimited data scale, access, and performance.

Snowflake's platform foundation is based on cloud services, query processing, and database storage, using these elements to unite siloed data, easily discover and securely share governed data, and execute diverse analytic workloads.

Why Snowflake and Wasabi Are Better Together?

Together, Snowflake Data Cloud and Wasabi hot cloud storage provide the framework for powerful and scalable data ingest, management and analytics coupled with bottomless cloud object storage to help you meet your organizational growing data requirements.

Snowflake's Data Cloud can be integrated with Wasabi via S3 API for improved data analytics management from anywhere. The integration provides a highly cost-effective cloud object storage solution that, along with immutability, offers protection against ransomware attacks.

Additionally, Wasabi's hot cloud storage provides instant access to your data without excessive egress or API fees. So, no matter how frequently you access the data, you never get penalized or overcharged and finance teams love the flat pricing that's easily forecastable in quarterly budgets.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi’s solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data “hot” so it can be accessed in milliseconds. All Snowflake and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology’s fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
