wasabi The AI Storage Cloud | WEKA®

SOLUTION BRIEF

WEKA + Wasabi | Snap-to-Object

Protect High-Performance Data Without High-Performance Storage Costs

Extend data protection beyond the performance tier with scalable, cost-efficient object storage.

The challenge

Artificial intelligence (AI), high-performance computing (HPC), and data-intensive applications depend on continuous access to critical datasets. But protecting those environments can become increasingly expensive when recovery copies consume the same premium storage resources needed for active workloads.

Organizations need a way to preserve critical data, support recovery objectives, and reduce the cost of retaining protection copies without compromising their investments in high-performance infrastructure.

The WEKA + Wasabi solution

WEKA and Wasabi combine high-performance data infrastructure with durable, cost-efficient cloud object storage to support snapshot-based data protection strategies.

WEKA provides the performance and snapshot capabilities needed to support data-intensive applications, while Wasabi serves as a scalable destination for protected data through supported snapshot-to-object workflows.

Together, they help organizations extend their data protection strategy beyond primary infrastructure while maintaining predictable storage economics.

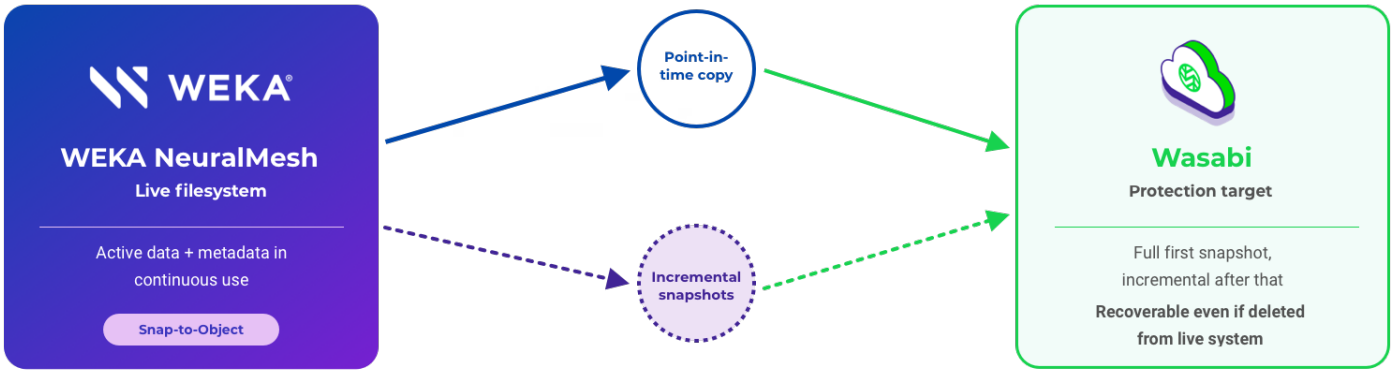

Benefits

- Protects critical data with point-in-time recovery
- Lowers protection storage costs
- Strengthens cyber resilience
- Scales protection economically

Use cases

- AI model checkpoints
- HPC datasets
- Research environments
- Critical enterprise workloads
- Large-scale data protection

Backup · Disaster recover · Ransomware / insider-threat recovery
Cloud migration & bursting

The bottom line

High-performance data deserves high-confidence protection, not high-cost retention.

With WEKA and Wasabi, organizations can protect valuable datasets while optimizing the economics of their recovery infrastructure.

ABOUT WASABI

Wasabi provides simple and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data with no complex tiers or egress or API fees, delivering predictable costs that save money and industry leading security and performance businesses can count on. Trusted by customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston. Wasabi is a Proud Partner of the Boston Red Sox, and the Official Cloud Storage Partner of Liverpool Football Club and the Boston Bruins.
