

Automated File Tiering & Archiving to Wasabi Hot Cloud Storage with PoINT Storage Manager

What is PoINT Storage Manager?

PoINT Storage Manager supports you in optimizing your storage infrastructure and in long-term storage of important company data. The file-based tiering and archiving solution integrates a variety of storage technologies, independent of the manufacturer, and relieves cost-intensive primary storage from inactive data. PoINT Storage Manager archives your data in a legally compliant way and at the same time ensures fast and transparent access to the archived data.

Why PoINT and Wasabi Are Better Together?

PoINT Storage Manager provides a policy-based file tiering and archiving solution which is tightly integrated with Wasabi hot cloud storage to specifically address the problems associated with the growth of inactive and unstructured data stored on primary storage systems.

PoINT Storage Manager offers the features necessary to establish a comprehensive enterprise-wide data archiving solution. Based on individually defined policies, it identifies and archives data from any file share location to the Wasabi cloud. At the same time the solution allows file system clients to fully and transparently access archived data via file system links and HTML web links. It also provides search and retrieval of archived data to authorized users using any web browser.

In combination with Wasabi, users have an easy-to-scale solution that guarantees maximum flexibility and cost control. Since there are no costs for egress or API requests with Wasabi, archived data can be easily retrieved.

KEY FEATURES

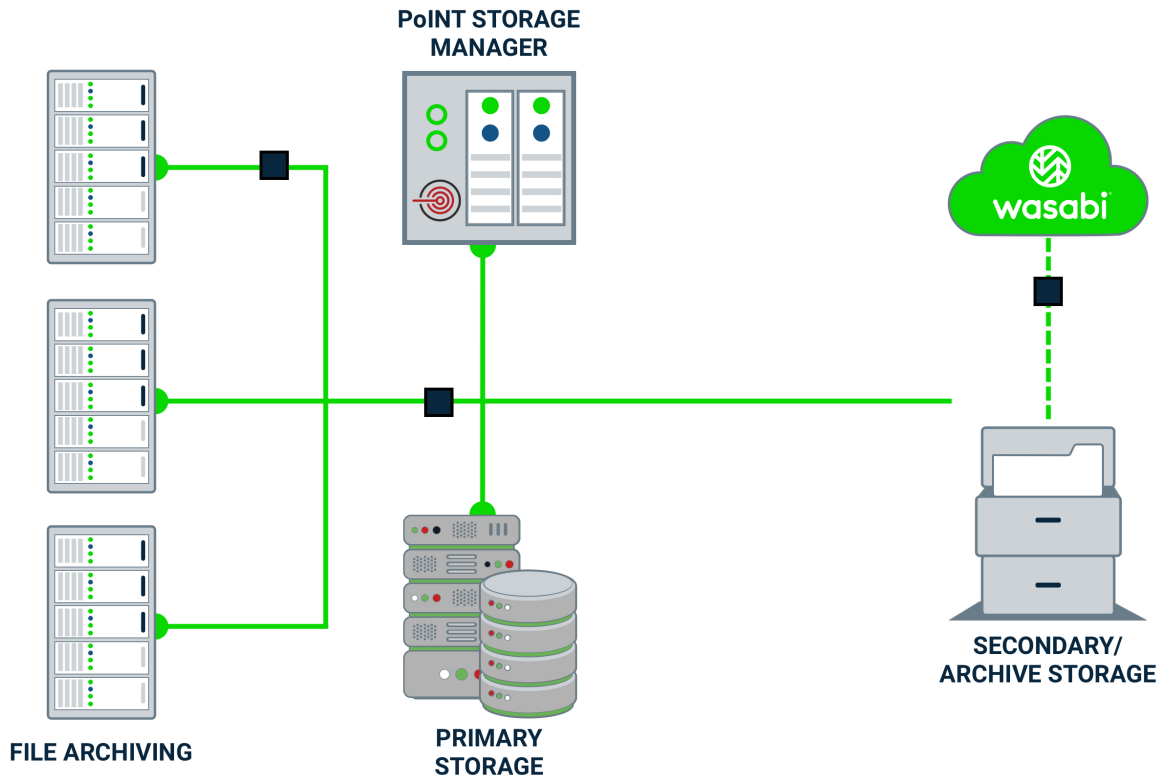

- Archive files to Wasabi hot cloud storage from NAS
- Policy-based file tiering and archiving
- Retention management and WORM protection for archived data
- AES-256 Encryption for data in-transit and data at rest
- Advanced Logging, Verification and Authentication
- Archive browser for transparent search and retrieval of archived data

BENEFITS

- Fast retrieval of archived content stored in the cloud
- Achieve compliance with archiving requirements
- Significantly reduce CAPEX expenses for storage

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All PoINT and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
