

Wasabi Partner Network

Technology Alliance Program

Program Overview

The Wasabi Partner Network program for Technology Alliance Partners is designed to foster joint collaboration efforts that lead to higher market share and profitability for our Partners. By combining the power of Wasabi hot cloud storage with your technology, you can accelerate your customers' digital transformation and lower the total cost of your solutions.

Wasabi partners with industry leading companies, selling both hardware and software, to deliver cloud storage solutions across the globe. Joining the Wasabi Technology Alliance Partner Program gives you the ability to market a pre-validated solution with Wasabi to your channel and customer base as well as access marketing resources, sales relationships, and more to drive demand for your disruptively affordable solution for your customers.

Program Levels

Validated - Validated Partners are building their solution with Wasabi. These partners recognize the value of going to market with Wasabi to create a simple, flexible solution leveraging Wasabi as a storage destination for our channel partners and customers.

Featured (Invitation Only) - Partners are invited to be Featured partners when they have significant market presence, include and promote Wasabi in their go to market efforts, collaborate with the Wasabi team and successfully position Wasabi to their customers. At this level, partners have access to increased go to market and sales support and business development opportunities.

Technology Integration

Wasabi partners are committed to building a validated integration with Wasabi leveraging the S3 compatible API giving customers confidence in the joint solution. Wasabi technical documentation, access to the Wasabi service, and support are made available to partners as needed during this process.
