

Lightning Fast, Simple And Cost-Effective Data Migrations To Wasabi

Data is growing globally at a rate of 19.2 percent between 2020 and 2025. Due to this growing demand, organizations are becoming aware of the true cost of maintaining their data as well the impact that losing their data can have. Organizations are looking for alternatives that provide a high-quality experience but at more affordable rates, or a location to backup and archive data that is no longer required on other platforms.

Movebot has been architected and designed to offer a seamless, rapid migration experience regardless of source location. Movebot is capable of transferring an organization's data from an object storage bucket, a traditional file server or an enterprise collaboration suite. Movebot keeps it simple through its intuitive and user-friendly interface, and makes it easy to transfer data at lightning speeds into Wasabi no matter the source location, all without the headaches that come with running your own infrastructure.

This joint solution is ideal for enterprises who are already in the cloud and those just starting their cloud journey. Movebot can assist in moving data from one cloud storage service to another, or from local storage to the cloud. Movebot makes the ordinarily slow and bandwidth-intensive process quick and easy, with the ability to move up to 100 TB of data per day.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Movebot and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.
