

Get a clear picture of your data spread with DataIntell and Wasabi

Overview

DataIntell is an application designed to help you better understand your data and storage utilization. This analytic tool helps identify old and unused files and gives better insights into data changes, file duplication and used space over time. It is designed to help deal with managing large amounts of data growth and provide detailed, user-friendly, and accurate analytics of your data use, storage, and cost, allowing you to optimize your storage and monitor its usage, whether it be in-prem or on the cloud!

Intelligent data management is an essential part of data utilization and can greatly optimize the operations and finances of businesses. With the average company managing over 100 TB of data and a trend towards cloud storage, questions of security of information, classification, efficient file research and cost control are becoming central issues

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on-demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of object durability and data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All DataIntell and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.

Gain greater data insights with DataIntell + Wasabi

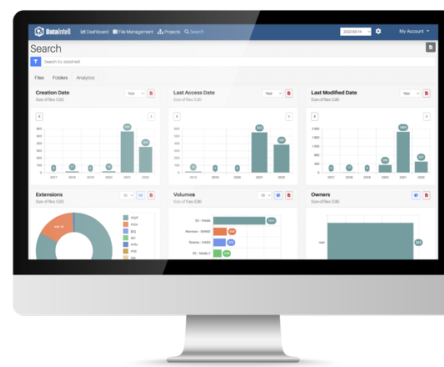

Customers using Wasabi hot cloud storage can maximize the value of their data by leveraging DataIntell's analytics platform. The DataIntell software can identify "cold" or inactive data on a customer's system. This data can be

KEY FEATURES

- Discover the true cost of storage with analytics and insights
- Centralized search engine for all the files and folders of an organization
- Monitor specific projects, groups or folders scattered through your infrastructure and in the cloud
- Find duplicated files between multiple storage sources & buckets
- Find any files with an easy-to-use search engine
- Single-pane-of-glass view into your entire storage array

BENEFITS

- Lower total cost of ownership for on-premises and Cloud Storage
- Recuperate capacity on your most expensive storage
- Give back control to data owners

taking up valuable real estate if sitting on-premises unused. DataIntell can calculate how much a group of files costs to store, and assists the customer in moving that data to a more cost-effective storage location, such as Wasabi. These cost-saving measures, combined with powerful search and data management functionalities, give customers the tools to make Wasabi's low-cost cloud storage even more budget friendly.
