Create an Impenetrable Cyber Storage Vault with Calamu and Wasabi

Combine Award-Winning Data Security with the World's Most Affordable and Immutable Hot Cloud Storage

Data volumes are growing at a breakneck pace, and many IT organizations are scrambling to add costly storage arrays to keep up. Cloud storage offers an enticing solution but protecting data from ransomware and data breaches is an added responsibility that leaves many IT leaders unsure about migrating data off-premises.

Calamu offers a robust set of data protection features designed to combat ransomware. Calamu Protect automatically fragments data across multiple separate storage locations while at rest, an environment called a data harbor, which instantly nullifies the impact of a data breach or ransomware attack. This fragmented data is worthless to cyber attackers, leaving your business in the clear should a breach occur. Additionally, Calamu automatically self-heals from cyber attacks. Your critical data remains available as if nothing happened, ensuring business continuity in the event of an attack. Should you need to reconstitute your data, or self-heal from a cyber attack, Wasabi won't charge for egress or API fees.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, fast, and reliable cloud storage on demand. Wasabi's solution is 80% less expensive and is faster than first-generation cloud vendors. Wasabi hot cloud storage is designed with eleven nines (99.999999999%) of durability and provides data immutability that guarantees stored objects cannot be deleted or modified by anyone. Not only is Wasabi 80% less expensive to store data than traditional cloud providers, but there are also no fees for egress or API requests. Wasabi keeps all data "hot" so it can be accessed in milliseconds. All Calamu and Wasabi customers can treat their data as hot data, so they can shorten upload windows and quickly access their data for faster restore times.
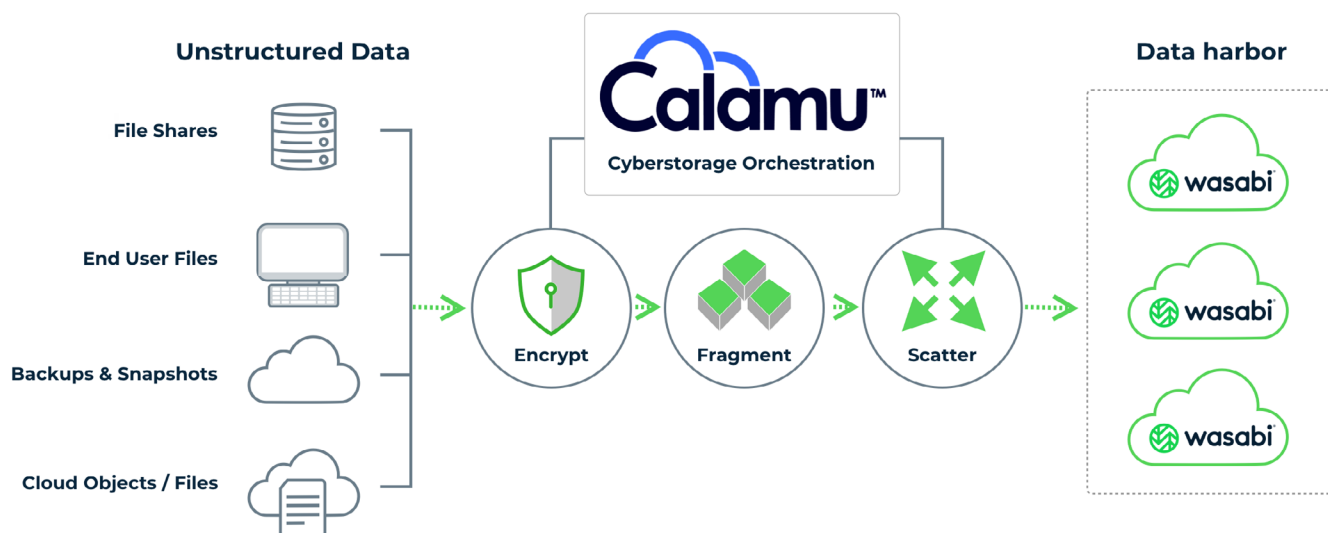

KEY FEATURES

- Ultra-low-cost cloud storage for any purpose
- Easy-to-use file management and data protection tools
- Seamless integration and operation
- Fast and reliable cloud backup and recovery for diverse operating systems, hypervisors and hardware platforms

BENEFITS

- Slash storage and data protection cost and complexity
- Simplify setup and administration
- Accelerate backup and recovery cycles
- Reduce risk and exposure due to data loss
- Protect against equipment failures, disasters, human error, ransomware and malware

Calamu + Wasabi: Better Together

Wasabi has partnered with Calamu to offer a cost-effective, highly secure cloud storage solution that prevents data from being stolen or leaked while simultaneously boosting the reliability and durability of stored data. Wasabi hot cloud storage is highly affordable, immutable and offers high performance object storage for any use case. Calamu turns that storage into a nearly impenetrable cloud storage vault by adding patented data processing and award-winning security features. Together, the integrated solution enables you to store data in the cloud without risk that it will be lost, stolen, or held for ransom due to a cyber attack. Even if a cloud breach is detected, Calamu will automatically quarantine the compromised location and self-heal your environment, ensuring data stays out of enemy hands.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
