

Holistic Image Backup and Restore with Actiphy ActivelImage Protector™ & Wasabi Cloud Storage

Overview

Enterprises are experiencing the strain of unstructured data growth. Data continues to not only accumulate year over year but is spread across numerous devices and storage mediums. Managing all this data has become a cumbersome full-time job in many organizations and IT teams are searching for a holistic solution to data storage and protection that incorporates all the options data is stored within a modern enterprise.

Actiphy's ActivelImage Protector, A Complete System Backup & Recovery Solution

ActivelImage Protector, a full-service data protection solution that supports both virtual and physical machines is designed to provide a fast and successful backup and recovery of data over most storage mediums that include HDD, USB devices, LTO tape, network storage, and now Wasabi hot cloud storage.

ActivelImage Protector restores your entire system which includes the operating system, data and volumes in a single operation. In the event of a hardware failure of the backup source machine, the entire system can be restored to a different physical, virtual, or a cloud-based machine.

Any backup image in Wasabi can be restored directly to a virtual machine in a public-cloud environment (EC2, Azure, etc.). ActivelImage Protector reduces RTO by employing HyperRecovery LIVE!™ and In-Cloud Standby™.

Wasabi Hot Cloud Storage Delivers Breakthrough Economics and Performance

Wasabi is the hot cloud storage company delivering low-cost, high performance, and reliable cloud storage on-demand. At one-fifth the price and faster than first-generation cloud vendors, Wasabi's hot cloud storage is designed with 99.999999999% of object durability

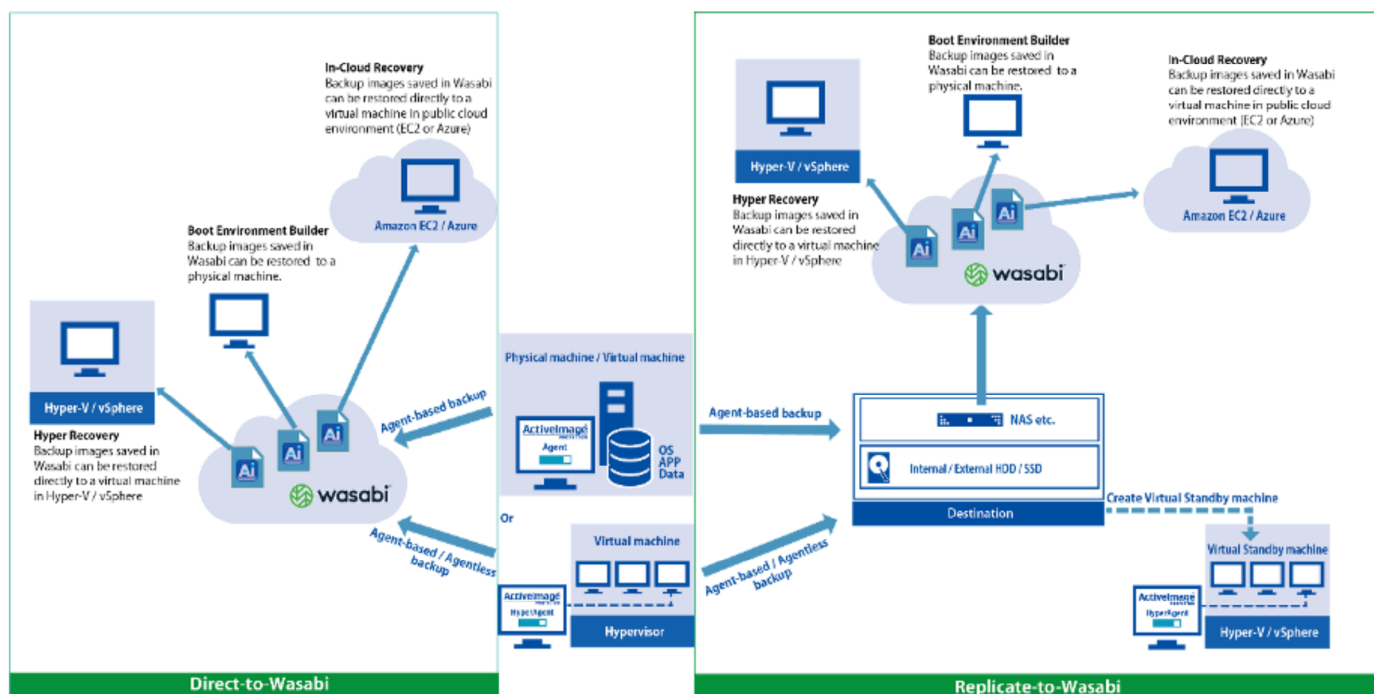

KEY FEATURES

- Direct-To-Cloud Backup to Wasabi cloud storage
- In-Cloud-Recovery restores from Wasabi cloud storage directly to a Hyper-V or vSphere environment, or in to a public-cloud environment (EC2, Azure)
- Replicate backup images to Wasabi cloud storage

BENEFITS

- Backup directly to Wasabi cloud storage without capital expenditure for on-site storage hardware and maintenance
- ActivelImage Protector is a cost effective, efficient and trusted backup and disaster recovery solution
- Easy, quick, reliable, and secure cloud object storage
- Agent-based and Agentless Backup

and data immutability that guarantees stored objects cannot be arbitrarily deleted or modified by anyone. In addition, to being 80% less expensive than traditional cloud providers, there are also no fees for egress or API requests. By keeping all data “hot”, Wasabi makes data accessibility immediate. As a result, using Wasabi’s cloud storage with Actiphy’s ActiveImage Protector, upload window and restore times are significantly reduced thus providing a faster recovery.

ABOUT WASABI

Wasabi provides simple, predictable and affordable hot cloud storage for businesses all over the world. It enables organizations to store and instantly access an unlimited amount of data at 1/5th the price of the competition with no complex tiers or unpredictable egress fees. Trusted by tens of thousands of customers worldwide, Wasabi has been recognized as one of technology's fastest-growing and most visionary companies. Created by Carbonite co-founders and cloud storage pioneers David Friend and Jeff Flowers, Wasabi is a privately held company based in Boston.
