hot cloud storage

"NFDHybrid Cloud"

Limited internet speed – supports low speed or high latency connections without loss

Fully Agnostic – VMS, Analytics, Camera: expand the system you have, no need to replace
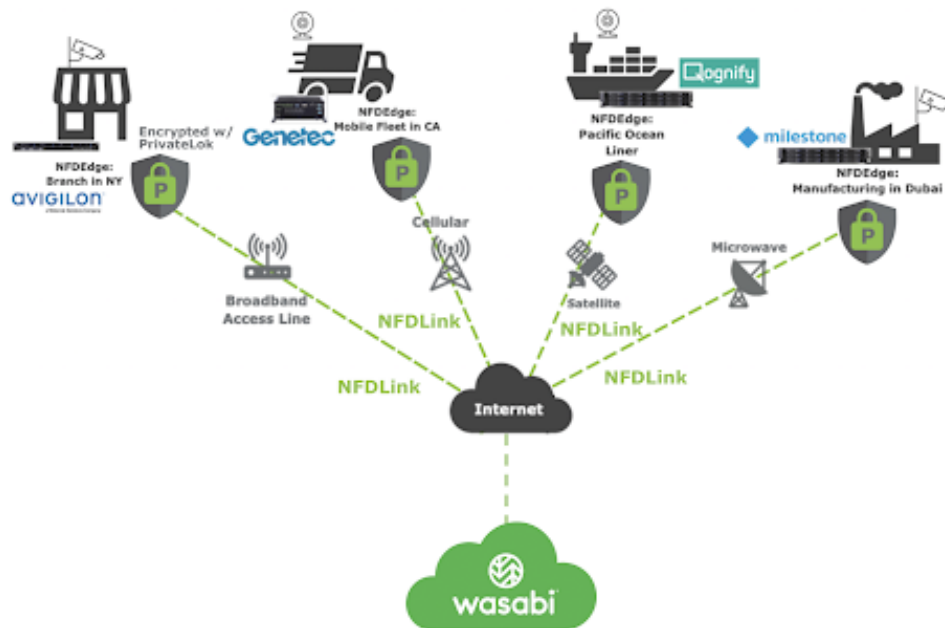

Additional Encryption – object level encryption before transit through rest

Full HD Support – no compression and no video downgrading

Fixed & Predictable costs - no out-of-pocket cost with "Hardware-as-a-Service" model

Flexible platform - hosted hybrid cloud solution puts video where you want it

Bottomless capacity — tap into Wasabi's cloud for highly scalable storage

Rasilient and Wasabi partner up to provide affordable, secure, and scalable cloud storage for video surveillance deployments at the edge.

The NFDHybrid Cloud solution provides a straight-forward hardware platform to expand traditional VMS sites with hosted storage. This can be used to meet compliance concerns for retention, off-site storage, or disaster recovery. This solution blends natively into your existing workflow without requiring additional training. Each site can be configured based on its unique needs and equipment.
